GAME BOY GROWS UP

There's no keeping up with the ever-expanding Game Boy library, though the Game Boy Player's Guide is a good place to start. It's chock full of winning strategies, maps and special tips for 28 of the best games for the leading compact video game system.

When you're playing ultra-challenging games like Tetris, Castlevania, Operation C, Gargoyle's Quest and The Final Fantasy Legend, it pays to know what your next move should be. And that's what this guide, brought to you by the pros who create Nintendo Power, is all about. So you want to know how to refill your energy instantly in T.M.N.T.—Fall of the Foot Clan? Save the world from the BYDO Empire in R-Type? Soar by your friends in a Game Link match of Dr. Mario? Read on!

You should also check out the thoroughly researched Game Boy Directory and Index. There, you'll find descriptions, screen shots, Game Link Info and Power Meter scores for all of the Game Boy games to date. Use this valuable guide to over 130 Game Boy titles when choosing your next

compact challenge.

Games in the Directory are broken up into six categories: Action, Adventure, Puzzle, Quiz and Productivity, RPG and Sports. The Action category is the largest. It covers games that require quick reflexes and steady hands. Games in the Adventure category are usually long action-oriented quests that involve decision making. The Puzzle category is made up of brainteasers that take a lot of thought and strategy to master. In puzzle games, you've got to know all of the pieces and figure out how they fit together in order to reach your end goal. The Quiz and Productivity category covers game show adaptations and the new series of Infogenius Game Paks. Games in the RPG, or Role Playing category, are adventures that focus more on character building and puzzle solving than action. And the Sports category speaks for itself. Most of the games in this group are Game Linkers that are great for solo play or for a friendly challenge with your pals.

Even more Game Boy games are being developed as this guide goes to press. Keep watching!

SUPER MARIO LAND™

It's A Whole New World!

A new Princess to rescue and the untamed land of Sarasaland await you in Mario's first Game Boy Adventure! The setting is strange, but the theme is familiar and fun.

© 1990 Nintendo

MARIO'S METAMORPHOSIS

Try playing a Mario game without a single Power-Up: it can be done, but it's twice as fun with a Mushroom or two.

SUPERBALL FLOWER

SUPER MARIO

MUSHROOM

As Super Mario, you can break blocks.

SUPERBALL MARIO

Collect a Flower to gain Superball power.

MARINE POP

SKY POP

Aerial levels require the Sky Pop airplane.

OTHER ITEMS

Items are hidden inside blocks throughout Mario's adventure. Finding and collecting them will increase your odds of survival.

COIN

Collect 100 coins for a free life.

MULTI-COIN

These Blocks hold extra Coins and let you collect 100 quickly.

STAR

As usual, the Star grants Mario temporary invincibility.

LIFT BLOCKS

Lifts will boost Mario to the upper section of the map.

BONUS GAME

If you make it to the upper exit of each World, you can play the Bonus Game. You also get to play after beating each King.

Mario and the ladders will switch positions from level to level.

Push the A Button to stop the ladders and collect maximum 1-Ups.

SUPER MARIO LAND

LANDS AND VILLAINS

WORLD 1

BIRABUTO KINGDOM

Palm trees and pyramids grace the first World of Sarasaland. All new enemies inhabit the plains and hills.

CHIBIBO

Relatives of Goombas which attack slowly and surely.

PAKKUN FLOWER

These hungry carnivorous plants will eat you alive!

FLY

Swat these lumbering Flies before they stomp you!

NOBOKON

Turtle bombs that explode after being stomped.

BUNBUN

Fierce flies which attack with a shower of spears.

GAO

These guardians defend the pyramids.

KING TOTOMESU

This Sphinx's goals are no riddle—he's out to get Mario! Feed him a few Superballs to cool him down!

WORLD 2

MUDA KINGDOM

The small islands of the watery Muda Kingdom make precarious perches for the adventurer.

MEKABON

Don't lose your head when these robots lose theirs.

TORION

Watch out for these hungry fish when beneath the sea.

YURARIN BOO

These super seahorses leap from the water and spit fire.

HONHEN

Beware the Bone Fishes when they leap from the sea!

TAMAO

This fiercely loyal jellyfish defends Dragonzamasu.

YURARIN

You'll meet seahorses underwater.

GUNION

After you defeat Gunions, they split in two.

DRAGONZAMASU

The King of the Seahorses breaths fire at you. Evade him and return fire with the Marine Pop's guns.

WORLD 3

EASTON KINGDOM

You've found the source of the Easter Island statues in the Easton Kingdom.

BATADON

The flying statue heads fit about slowly.

GINA

Pipe Cannons fire these deadly projectiles.

|--|------------------|
| | 1-UP HEART |
| | MUSHROOM |
| | MULTI-COIN BLOCK |
| | LIFT BLOCK |
| | STAR |

Here's your introduction to Sarasaland. You won't find many surprises in the first level if you've played a Mario game before. The play control is similar to the original SMB game.

COIN ROOM

Twenty one Coins are your reward for entering the pipe.

COIN ROOM

Duck into this pipe to get 18 bonus coins. You'll return to the World from the same pipe.

1-UP HEART

Don't miss this or any of the other 1-Up Hearts, especially early in the game when they're easy to get. You won't find many later on.

A TIGHT SQUEEZE

To collect the Coins in these narrow passages, fire a Superball into the gap.

STAR

Grab the Star and dash to the right while you're invincible. You can go as fast as you like, because you won't miss any hidden items in this stretch.

WORLD 1-2

Be careful on the moving lifts in this World. Mario's jumping control is similar to the original SMB game. He falls fast and it's hard to control his trajectory in mid-air.

LEARN THE LIFTS

When the lift you're riding reaches its highest point, jump to the next one. Be patient and perfect your timing on all lifts.

START

BUNBUN CAN BE FUN!

When Bunbun gets close, fire a Superball to knock him out. If you don't have Superball power, get close and run under after he drops a spear.

A HIDDEN HEART

Sometimes invisible blocks hide items. Jump under the spot where the Invisible Block is located and it will reveal the Block and the item. Collect and continue!

MASTER THE POSSIBILITIES

Use the ricochetting properties of the Superball to take out hard to reach enemies. To hit a Bunbun high in the sky, bounce your shot off the edge of a ledge.

DROPPING LIFTS

Dash across these lifts to make it to the upper exit door. If you hesitate, the lift will fall.

SUPER MARIO LAND

WORLD

1 — 3

START

HOP A HIDDEN LIFT

Be sure to take the Lift Block to the upper part of the stage. It's an easier path and you won't miss anything below.

COIN ROOM

In this Coin Room, you can get a total of 25 Coins.

FIRE!

As soon as you see Gao, launch a Superball to knock him out.

COIN ROOM

Use the Lift Block to reach this room. Use a Superball to get 33 Coins.

BURIED TREASURE

You have to be small to go through the passage that leads to the Coins under the pyramid. You can Power-Up later.

TRIUMPH OVER TOTOMESU

Five hits with the Superball will beat King Totomesu. Fire rapidly while dodging his fiery breath. Jump to the axe to beat him more quickly.

WORLD

2 — 1

START

SCORE THE COINS TWICE

Before entering the Coin Room, collect Coins from the Multi-Coin Block. Enter the room and collect all the Coins. Exit and get the Coins outside again.

COIN ROOM

A total of 78 Coins can be had in this Coin Room. Break blocks and use a Superball to get them all.

COIN ROOM

Although there are only 20 Coins in this Coin Room, you should never pass up a chance to get more loot.

1-UP HEART

To capture this 1-Up, you must be big. Break the first block, then hit the Item Block above it. As the Heart falls, jump to the platform where the Coins are to collect it.

GAME BOY

WORLD

2 - 2

START ▶

COIN ROOM

This Coin Room also holds 78 coins (plus some in a hidden Multi-Coin Block). Check it out!

MEKABON MADNESS

The Mekabon's head serves as its weapon. It will regularly launch it in search of Mario. Your best bet is to quickly stomp the robot before it attacks.

TRICK FLOOR

To reach the lower passage you must use an Invisible floor that covers part of the gap. You must be small to fit into the passage.

COIN ROOM

This Coin Room has only 18 coins. The Invisible block that will allow you to exit the room is towards the left side this time.

HOP TO IT!

It's difficult to reach the upper exit of this World. You'll have to quickly hop up the small dropping lifts to make it.

WORLD

2 - 3

START ▶

MARINE POP POWER-UP

Hidden in the blocks at this point is a Power-Up that will make the Marine Pop increase in size.

TORION ATTACK!

The Torions attack like torpedoes in groups of three. Blast them when they first appear.

GUNION

After you shoot a Gunion, it will explode into deadly fragments, so be ready to dodge. You can also just go around the passive octopi.

MARIO MONEY!

These Coins have your name on them! Dash forward and get as many as you can, then go back and get the ones you missed.

DEFEAT DRAGONMASU

Watch the pattern of Dragonmasu's fire and Tamao's movement. The bottom of the screen is the safest place to be.

SUPER MARIO LAND

WORLD

START

COIN ROOM

Collect the nearby Coins before you go into the Coin Room. You'll be able to collect them again when you exit.

A DEADLY TRAP

Don't jump for these Coins, because there's no safety net below. You can only collect them with the Superball.

MEGA COIN ROOM

This Coin Room has over 100 Coins in it, which means a guaranteed free life if you get them all.

GALLOPIN' GANCHAN

The Ganchan looks like a menacing boulder, but it's really your ticket over the spiked pits ahead. Carefully climb onto it and ride it across the spikes!

WORLD

3 → 2

START

TAKE ME TO THE TOP

You can make an Invisible Block appear at this point and use it to take the upper level of the World past the spiders ahead.

GIRA CANNON AHEAD

The Cannon is shooting Giras. Be careful. Collect a Super Mushroom nearby the Cannon with caution.

ANOTHER ROCKY RIDE

It's a little more difficult to get onto the boulder at this point. Be sure to jump off the boulder before it plummets into the pit.

COIN ROOM

A hidden Lift Block will allow you to make it to the Coin Room above. Unfortunately, this time you won't get a shortcut out of the deal.

CRUMBLING BRIDGE

At the end of the World, you'll have to leap quickly to make it across the bridge of falling blocks.

GAME BOY

WORLD 3

3 3

START ▶

COIN ROOM

It can be tough to reach this Coin Room. Stay on the moving platform and jump quickly from the dropping blocks to the pipe when the coast is clear.

COIN ROOM

Don't miss the coins in this secret Coin Room.

NIMBLE LEAPING NECESSARY

Jump onto the moving lift and then jump up. Work your way over to the other side of the barrier and onto the next moving lift. Quickly jump up and continue right.

B BUTTON BOOGIE

Hold down the B Button to run rapidly over the small gaps at this point. If you're small, take the risk of collecting the Power-Up.

HURLE HIYOIHOI

Hiyoihoi attacks by hurling large stones at you. Use the stones to your advantage to get a boost over the gap in Hiyoihoi's chamber. From the top of the rock, leap for the goal to finish off Hiyoihoi.

WORLD 4

4 1

START ▶

As you'd expect, the Chai Kingdom is the toughest yet. Tatanga is waiting and he does not expect you to make it. You'll really have to run the gauntlet of enemies to make it through this World.

GRAB THE STAR

Jump as high and far as you can from the tallest pipe. You'll hit the roof and collect a valuable Invincibility Star.

COIN ROOM

Press Right on the Control Pad as you enter this Coin Room to reach the most Coins, or use a Superball to get them all.

PINOPI IS NOT PLEASED

Pinoopi is a glutton for punishment—if you stomp him, he'll revive and continue his attack. Once you've stomped him, press on!

DON'T LOOK DOWN

Don't panic when you reach these dropping lifts. Jump carefully and accurately.

B BUTTON DASH

Hold down the B Button to run over the falling blocks at the end of this World.

SUPER MARIO LAND

WORLD

4 — 2

START ▶

COIN ROOM

This coin room has 235 coins in it. To get all of them, one must use the Superball!

BREAK DOWN THE WALL

If you're Super Mario, break down the wall and enter the upper path at this point. It's a little easier and contains coins and Power-Ups.

INVINCIBILITY HAS ITS PRIVILEGES

WORLD

4 — 3

START ▶

THE SKY IS FALLING!

The Chickens seem innocent enough, but they'll ram you when they get close. Blast them quickly or keep your distance.

RUN OVER THE GAPS

Again, hold down the B Button and dash over the gaps close to the end of the World.

ALL THAT GLITTERS . . .

It's best to avoid the Chikako sky mines because they take 10 hits to destroy. Don't mix them up with Coins.

BROKINTON

Keep your distance when Brokinton moves left, and get your hits in when it moves right. Fire continuously to win.

BETWEEN A WALL AND A HARD PLACE

Hold Left on the Control Pad when you're between a wall and the edge of the screen to survive.

FINALLY — TATANGA!

There's no trick in defeating Tatanga. Avoid the balls he shoots and return fire continuously. Dodge and destroy!

JACK NAPIER

Jack is fast and powerful. Try to collect the Batarang or Power Weapon before you get to him. Then stay on the other side of the screen, kneel down and fire away.

Kneel and fire at Jack Napier. If you knock out all of his energy, he'll drop into the vat below.

STAGE 2-1 GOTHAM CITY

Jack's dive has driven him insane. Now, as the Joker, he holds Vicki Vale captive at the museum. Make your way there and hurry!

JUMP QUICK

Blocks fall on these narrow platforms. Jump off of them quickly before they can crush you.

KEEP MOVING

The chance of precipitation is 100 percent as blocks continue to rain down.

HAVE HEART

Don't break the block in the center here. You'll need to use it as a boost to get to the Heart on the platform to the left.

BAG THE BATARANG

Use the blocks in the center as a platform, then jump up and to the left in order to collect the Batarang.

AVOID THE SHOTS

Wait for shots to stop temporarily. Then leap from this block to the floor and continue your journey.

A HELPFUL HIDDEN BLOCK

Jump up and down on the second block here and repeatedly fire your weapon to make a hidden block appear.

STAGE 2-2 THE MUSEUM

The Joker has seen fit that there are plenty of places for you to fall in this trap-ridden area. Watch out!

POWER BLAST

Stay behind the blocks here and blast through them with a powerful weapon. You'll quickly clear the area of the Joker's thugs.

GO HIGH

Take the upper route here and blast the block in the center to collect the super-strong Tranquillizer.

HEART ALERT

Unless you're already at full energy, you should break the blocks in this area and collect a Heart.

DOUBLE 1-UPS

There are two, count 'em, two 1-Ups in this small area. You'd be crazy if you didn't grab them.

WATCH YOUR STEP

Be extra careful as you move from one narrow platform to the next.

PASS UP THE POWER-DOWN

The Shot is way too difficult to collect and you wouldn't want it anyway.

STAGE 2-3 THE MUSEUM

This place is huge! There's only one more wing to explore and you'll smoke the Joker out from his hiding place.

UP AND AWAY

The upper route should be your choice here. If you go low, you'll be forced to take down-grades.

FALSE FLOOR

Enemies wait below for you to drop through trap doors. Watch out!

LONG JUMP

You'll be able to just make the leap to the 1-Up if you start from the left edge of the block.

HIGHER IS BETTER

Jump to the top of this area and take all of the bonuses. If you go low, you'll get nothing but bad items.

The bonuses are much better on top of this obstacle.

STAGE 3-1 OVER GOTHAM CITY

Vicki was saved, but the Joker got away. Now, take to the air and try to keep the Joker from taking over the city.

CURB THE 'COPTERS

The Helicopters fly in a straight line. Blast them if you can or just move out of the way.

MAKE A HOLE

Four Planes attack in a vertical formation. Take one out and fly through the hole.

HEAVY ARTILLERY

Huge 'Copters shoot three bullets at a time. Avoid the fire and hit them with your own power.

BEHIND YOU!

Giant Jets attack from the rear. Watch where they fly and fire-off the rear Guns.

A MIXED ATTACK

Both Big and Small 'Copters attack at once! Hit what you can and try to avoid the rest.

HOT AIR AND COLD FIRE

Slow moving Blimps and fast Missiles from the ground make the going tough in this area.

AN EXPLOSIVE COMBINATION

Jets soar from behind and Missiles attack head-on. Aim for one as you dodge the others.

STAGE 3-1

BOSS

The fast moving machine at the end of this stage has been sent by the Joker to slow you down as he makes a mess out of the Gotham City anniversary celebration below.

THE FRONT

Dodge the fire of the giant mechanoid and fire the front Guns by pressing the A Button.

THE REAR

Press the B Button quickly and repeatedly to fire the rear Guns when the Mechanoid is behind you.

STAGE 3-2 OVER GOTHAM-THE SECOND WAVE

Since you survived the first round of fliers a new fleet is up and ready to take you down.

RETURN OF THE JETS

While these Jets are tough, they're small potatoes compared to what's on the way.

MYSTERIOUS FLOATERS

These big Balloons are unbeatable. Get out of their way and keep flying toward the goal.

ANOTHER TRY

The Blimps and Missiles are back. You beat them before. Now, for a repeat victory.

BOSS-2

Watch out! This 'Copter is not messing around. It's loaded with some major firepower and it's ready to take down anything in its path, including meddling Bats.

BOSS-2

The 'Copter releases a vertical line of fire that converges on the Batwing. Then it sends out probes that fly to the four corners of the screen to seek and destroy intruders. Fly fast and avoid what you can.

Dodge quickly as the line of fire converges.

Watch out for the Probes and target the 'Copter.

MISSILE MANIA

Missiles fly from below and ahead here. Figure out where they're going and avoid them.

BLIMPS-A-PLenty

The Blimps line up and attack en masse! Fly between the lines. You're almost to the goal!

STAGE 3-2

FLIGHT PATTERN

GOAL

The enemies come out in bulk in this stage. You'll have to keep firing with both Guns to find any clear airspace. Try to save as much

energy as possible for the dual Boss attack at the end.

BOSS-1

The Gigantic Plane near the end of this stage fires ahead and above. Fly away from the fire and stay as far away as you can. Then pelt it with your own power-packed shots.

The Plane fires ahead and above. Avoid the Bullets. Stay away and fire at the Plane repeatedly.

STAGE 3-1 FLIGHT PATTERNS

GOAL

The Battle over Gotham is at least as challenging as the fight on the ground and the enemies come at you a lot quicker. Study the flight pattern and prepare for every attack. The most difficult situations are when two kinds of aircraft attack all once.

STAGE 4-1 THE GOTHAM CATHEDRAL

The Batwing's been grounded and so has the Joker's attempt on the city. It's just you and him for the final chase.

W SP N B H BW G B

WAVE THE WAVE WEAPON

Accuracy is extra important in your fight to the top of the Cathedral. Refrain from collecting the Wave Weapon, on and try to stay with something that shoots straight like the Batarang, Power Weapon or Tranquillizer.

TAKE AIM AT THE BATWING

Blast the block that holds the Batwing, but don't fire on the block next to it. You'll need to use it as a platform to collect the Batwing.

MAXIMIZE YOUR POWER

If you've collected all of the Spear Up Power-Ups to this point, you'll be able to fire as many as seven shots at once.

Collect the Spear Ups for a seven shot max.

STAGE 4-2 THE GOTHAM CATHEDRAL

One last section of the Cathedral remains. You're about to finally face the Joker and fight to the finish.

START U P F D 1-UP B H SP B

A NON-STOP BATTLE

The action automatically scrolls to the right in this area. Keep firing and jump as soon as the target area is clear.

There's no time to rest. The Joker is getting away.

FIRST THINGS FIRST

You probably won't have the time to collect many items in this section. Concentrate on jumping to the next platform, then try to collect items.

Forget the Items and jump for the platforms.

LAST CHANCE 1-UP

The last 1-Up that you'll see before your battle with the Joker is in this area. Collect it if you can.

Pass by the Spear Down, but get the 1-Up.

Get the Smoke Pellet to quickly clear the immediate area or stay behind an obstacle and fire through it to beat the enemies on the other side.

Grab the Smoke Pellet or hit the enemies through the barrier.

SURPRISE ATTACK

A Robot paces left and right on the low platform. Wait for it to start moving to the right, then jump down and hit it before it turns around. At this point, it's important to avoid any enemy contact that you possibly can.

Surprise the Robot by hitting it while it moves away from you.

PASSAGE TO THE 1-UP

Jump and fire into the air around this area and you'll uncover hidden blocks which you can step onto and climb to the 1-Up.

Fire in the air to make hidden blocks appear.
Jump on the blocks and get the 1-Up near the ceiling.

RUIN THE CANNONS

There are Cannons on the only platforms in this area. Hit them quickly and jump for the platforms.

Jump and aim for the Cannons.

The Batarang is very effective here.

THE JOKER

The transformation of Jack Napier to the Joker has made him much more sinister, but it hasn't changed his fighting techniques. He still moves quickly and he still fires a powerful Gun. Stay away from him and fire when you have a clear shot.

Jack's back and he's not joking.

AVOID THE JOKER'S FIRE

STRAIGHT SHOTS
Kneel down and let the stream of fire go over your head.

TRIPLE SHOT
Jump as high as you possibly can to clear the Bullets.

VICTORY!

The Joker has tumbled to his timely demise. Gotham city is safe until the Bat signal shines again in the night sky.

OPERATION C™

Strike Back
Against Mad Mobs
From Space!

Get ready for out-of-this-space and explosive action as you test your shooting skills alone against the alien hordes and androids!

TM & © 1990 Konami.

GO SOLO AGAINST AWESOME ALIENS

As super commando "Scorpion," you've foiled attacks from outer space before (in Contra and Super C for the NES). But in Operation C, you must single-handedly conquer a homegrown alien invasion. Black Viper, an evil

alien commander, has set up a breeding ground for mighty android warriors on a remote desert island. It is essential that you destroy this creature cancer before it can spread to a populated part of the Earth!

THE PROBLEM AS YOU SEE IT

• AREAS 1, 3 and 5

The viewpoint on the action in these three areas is from the side, with vertical and horizontal scrolling possible. The B Button fires your weapon (hold it down for rapid fire). Most enemies can be avoided by ducking (press Down) or jumping (press A).

• AREAS 2 and 4

These two areas are displayed in an overhead view. Since you cannot jump, you'll have to use skillful movement to avoid enemies. The B Button fires your gun, the A Button does nothing.

AREA 1

START ▶

The entrance to Black Viper's base is guarded by the mindless alien drones that are common to the Contra series. They aren't very smart, but there are a lot of them and they attack from ahead and behind!

SNIPER SENTRY

Watch out for android snipers. Take them out with a well-timed jump shot or a diagonal shot. You can also stand directly below and fire up.

SPREADER GUN

Here's your first chance to get the Spreader. Shoot down the capsule and collect the booster when the coast is clear.

BACK BITERS

Turn and take out your pursuers from a crouching position, or leap at them from the top of the hill.

DUCK AND COVER

Hit the dirt! From a prone position you can hit the enemy gun port, but it can't hit you!

EVIL ELEVATOR

While this lift descends, flying laser robots will attack. Stand to the right of the platform and fire up to beat them all.

ATTACK HOVERCRAFT

The Hunter Gun is the best weapon for the Hovercrafts. If you don't have the Hunter, jump and press Down in mid-air, firing all the while, to destroy them.

STEALTH SUBMARINE

If you have the Hunter, the sub's a fish in a barrel. If not, use the same technique you did on the Hovercrafts.

AREA 1

SUPER TANK

Take out the gun ports of the Super Tank one at a time, and be wary of the Flame Gun in the center of the machine.

BATTLETRON TANK PART 2

Stay on the lower right of the screen and blast this tank's guns from the right side.

CONVEYOR BELT CANNONS

Four cannons move parallel to the conveyor belts, which move against you and slow down your forward progress. Try for the Hunter Gun as it makes this part easy!

ARMORED ANDROID CARRIER

Be careful of the grenade launcher in the center of this machine, and of the androids attacking from the left.

BATTLETRON TANKS

The tanks fire three shots in a spreading pattern. Find a safe spot between bullets and return fire.

The defense doors of the alien base are open, and you have to storm them before they close. Although many of the androids here are armed with guns, some don't even fire and those that do have limited range and accuracy.

AREA 2

This Area is known as the Mutant Mountains because of the frequency of genetically altered androids in the vicinity. Watch your six and advance on the double! Hit the dirt if you see a trap door ahead. Take out any pursuers, then turn your attention to the pop-up gun. It takes quick reflexes!

POP-UP CANNONS

These traps aren't well hidden (the trap door is a dead giveaway), but they can be tough. Duck, hit any troopers, then quickly get the cannon.

CLIMB THE MOUNTAIN

Find a safe spot out of range of the cannons; then get your shots in when you have an opening.

ROCK SLIDE

Wait for an opening in the landslide and then run past.

START ▶

OPERATION: ALIEN STORM

An endless supply of android attackers will assail you in this Area. High tail it to a spot where the androids keep coming from one direction and pick them off as they attack. For every 20,000 points you'll get an extra life.

SCOUT DRONE

At this point a Scout Drone will attack from above by shooting smaller attack bugs. Dodge and destroy enough of these bugs and the Drone will retreat. Stay on the right side of the screen and jump 'n' shoot.

TWO STAGE DEFENSE BORG

HOMING GUN MAKES IT EASY

The base stage of this Area Leader spits fire. Watch the timing to avoid the projectiles and keep firing at the left gun port!

Once you've destroyed the left gun port, get on top of the base and shoot diagonally down at the right gun port.

Finally, the Scout Drone from earlier in the Area will return. This time, concentrate your fire on the Drone for victory!

SOPPING WET SNIPERS

Shoot the android snipers in the waterfall when they are fully visible. Unseen, you can't hit them.

AREA 4
EXPERIMENTAL SPIDERBOT

The Spiderbot fires a laser beam which bounces around its lair, and it spits projectiles in a spraying pattern. There is no safe spot, but the bullets don't have much velocity and can be destroyed. Avoid the laser and keep firing with the Hunter.

ALIEN GATES

Timing is everything in getting past the Gates, especially when several come out at once.

CRACK SOME EGGS

Fire at the throbbing eggs until the spiders come out, then exterminate them!

The alien nursery is crawling with insectoids. Because they attack en masse, your best weapon is the Fire Gun. When you get to the Area Leader, however, the Hunter will be more useful. You'll find the Hunter inside of one of the alien eggs!

START ▲
NINTENDO PLAYER'S GUIDE

AREA 5
CEILING CANNONS

Keep your eyes peeled for the ceiling guns. Handle them just as you would an android sniper in the earlier levels.

BREEDING CHAMBERS

Stay alert as you pass the glass Breeding Chambers. The scorpions inside are old enough to fight, and some will break out of the jars and attack!

Black Viper's headquarters has more traps and alien defenders than ever. Try to keep the Hunter Gun or Fire Gun through the whole Area—you'll need the extra edge!

Watch your timing as you run this gauntlet of force fields.

The final mastermind, Black Viper, doesn't fight back. Waste this alien super computer to finish your mission! Good going, soldier!

BREEDING CHAMBERS

Shoot upwards to destroy the slime tubes on the ceiling.

ALIEN & SOLDIER

Try to make your way through quickly and avoid enemies if possible, but don't miss the Hunter Gun!

FINAL GUARDIAN

The super robot you'll face at the end of Area 5 is Black Viper's personal bodyguard. It was built to eat globe-savers like you alive!

The robot's first attack is with missiles from its back launcher.

Shoot these missiles down or avoid them by running away.

Jumping is also a good way to avoid the missiles.

The robot will try to attack by launching its pincer arms at you.

Since you can't destroy the pincers, duck or dodge to avoid them.

Before the robot fires, it hesitates. That's your chance to attack!

THE LEGENDARY LEE BROTHERS

The brothers Lee, Billy and Jimmy, are out for blood again! Billy's girl Marian, who spends more time in captivity than out, must be rescued once again. This time, however, a single Dragon must carry the burden of freeing fair Marian and Billy Lee is just the one to do it!

CHARACTERS AND CRETINS

BILLY LEE

Martial arts master, Billy Lee, is never far from trouble and he's usually in the thick of it. His favorite punching bags, the Shadow Warriors, are behind it this time—what do they have against Billy, anyway?

JIMMY LEE

Jimmy Lee's fighting skills are matched only by his brother's.

WILLIAMS

The most common rank in the Shadow Warriors are Williams. These thugs usually attack with a bat or other weapon.

LOPAR

Lopar rank Shadow Warriors often attack from both sides with heavy objects such as oil drums.

DOUBLE DRAGON

THE WAYS OF A WARRIOR

Billy has a ton of martial arts moves to cut loose with. Use the A Button to throw a punch and the B Button to kick. After you hit an enemy with three punches or one kick, your opponent will be stunned. You can then exe-

cute a special attack. These fancy moves can be tricky to pull off consistently because they require special sequences of buttons to perform. Practice makes perfect!

PUNCH

Billy's basic attack is less powerful than a kick, but enemies have difficulty blocking it.

UPPERCUT

After connecting with three straight punches, the fourth will automatically be an uppercut.

OVER SHOULDER THROW

After you've got a foe stunned, get close, press the A Button and the opposite direction on the Control Pad to throw him.

ELBOW PUNCH

When an enemy attacks from behind, pump the A Button quickly to execute an elbow punch.

HAIR PULL KICK

Once an enemy is stunned, press the directional arrow towards him and hit the B Button to pull off this move.

KICK

Billy's kicks will quickly double over an enemy, but sometimes the enemy can block or dodge this attack.

JUMP KICK

Press the A and B Button simultaneously to do a Jump Kick. This is useful for jumping over gaps.

SPIN KICK

Your follow-up kick on a stunned opponent will be a spin kick.

WILD WEAPONS

Some objects were made for brawlin'. Quickly disarm any weapon-carrying foe. Then take their weapons and give 'em a taste of their own medicine.

LINDAS

Female Shadow Warriors are known as Lindas. They strike with a bull whip in teams.

CHINTAI

Chintai are martial arts masters. They can block attacks and fight with whirling kicks.

ABOBO

Abobos are mutant strongmen. They are very tough and use brute force to fight.

WILLY

Willy is armed and dangerous, using a machine gun and punches to overwhelm his foes. Apprehend with extreme caution!

MISSION 1

CITY SLUM

This rundown neighborhood of old warehouses is the stomping ground of the Shadow Warriors (as in they'll stomp you if you dare to visit). Without any jumps or really difficult foes, this

mission is a warm-up and lets you practice your moves and fighting techniques.

MISSION 2

INDUSTRIAL

KILLER CONVEYOR BELT

To make the treacherous leaps on these conveyor belts, press the A and B Buttons simultaneously. If you hold the two buttons down, you'll jump a little farther.

This industrial wasteland provided safe haven for many a Shadow Warrior goon, that is until Billy the one-man army came to town. A couple

of difficult jumps on conveyor belts add to the challenge of this mission.

MISSION 2

TACTICAL OVERVIEW

As you fight your way into the heart of Shadow Warrior turf, you'll be attacked by more multiple enemies. Don't rely on fancy moves like jump kicks when you're surrounded; just give them a good old knuckle sandwich!

AVOID DAMAGE

In the narrow passages of the industrial area, there isn't room to dodge diagonally. Punch and punch again to take out the enemies quickly.

BANG-UP BULLY

When you step off the dumb waiter, you'll find a dummy waiting—Williams. Jump kick him to avoid his dynamite.

CHINTAI IN CHARGE

A group of enemies led by a Chintai is waiting for you at the top. The Lindas are easy. As soon as you beat them, stand to the left of the door and just start punching to get the Williams and Chintai against the wall. Don't stop until they are down for the count.

MISSION 3

DARK FOREST

The forest is thick and inhabited by a wide variety of wild life, in the form of Shadow Warrior toughs. This mission is longer than the first two and has more enemies. It's an endurance test to make it through!

Jump over the first rock, then hang out at the bottom of the cliff to avoid the second.

PERILOUS PLATFORMS

The timing is tough on these moving platforms. Jump when they are coming together.

MISSION 4

SHADOW WARRIOR'S HIDEOUT

Perched on a hilltop overlooking the city is the hideout of the Shadow Warriors. It's full of guards, traps and tricky jumps. Hop to it, Billy!

THE HILLS ARE ALIVE

As you make your way up the mountain to the Shadow Warriors' Hideout, you'll be assaulted by Lindas and challenged by jumps.

The hideout is a wild house! Again the Shadow Warriors foot soldiers will throw themselves into the fray, but it will be futile if you fight fiercely.

LINDAS

DOUBLE DRAGON

LOOK OUT BELOW, ABOBO!

Don't fight the Abobo on the narrow ledge, but lure him to the left so his back is to the pit. Then punch him over the edge.

ABOBO BUSTER

You've got plenty of room, so use diagonal movements to avoid the Abobo's attacks and punch him when you get close.

LOPAR ABOBO

CHINTAI TRIO

Beat the first Chintai by standing your ground and punching. Weave to avoid the next two and use straight punches and uppercuts on them.

THE CAVERN IS COLLAPSING!

As you fight this Abobo, the ground will crumble from left to right. As soon as you can, make your way to the right side of the screen. Hold off the Abobo, and he'll fall into the lava.

THE FINAL FIGHT

A Chintai and Willy are waiting for you in the heart of the hideout! Willy is like an Abobo— don't ever approach him straight on. Always use diagonal movements or jumps and hit when you get close. Beat him and Marian is yours!

NEMESIS

For Hire:
Space Aces Only
Need Apply

TM&© 1990 Konami

For Space Aces Only

Nemesis, the Game Boy version of Ultra's space action hit Gradius, has definitely got the right stuff. As the pilot of a futuristic space fighter, you'll match wits with an army of aliens in five levels of blazing action. Power-Up your ship after blasting the enemy in preparation for the mega-match at the end of every level. Nemesis includes a stage select as well as the option to choose the number of extra ship lives. Fantastic!

Customize Your Ship

One of the best elements of Nemesis is that you get to power up your fighter. Both offensive and defensive accessories are available. A new

accessory becomes available every time a capsule is captured. You can choose it then, or wait for some higher accessory. Speed, Double, and Option are your best bets. Missiles and Force Fields are a great bonus.

SPEED (S)

Maneuvering quickly when under intense fire is one of the most important abilities a ship should possess. The Speed accessory allows you to dodge incoming Missiles, Ships and other weapons, then rocket into position to take out the enemy. Two levels of Speed are available.

MISSILE (M)

Missiles fire at an angle toward the bottom of the screen, then hug the terrain until they encounter a target and blow it to plasma. There are two levels of Missiles available. In levels where guns and alien bases are positioned on the ground, Missiles are a big help.

LASER (L)

The Laser fires bursts of energy but, unlike other Gradius games, there is little advantage in using it because it doesn't fire any more rapidly than the Cannon. If you have maxed-out on your other systems, the Laser won't hurt your capabilities.

OPTION (O)

The Option is an awesome way to double your firepower. A ghost ship flies in formation with your fighter, blasting away with its Cannon to match your own shots. The only difficulty is in crowded areas. It's easy to confuse the real ship and Option and consequently you bump into things.

DOUBLE (D)

The Double Shot fires a second stream of cannon bullets at an upward angle. Used in conjunction with Missiles, it provides cover both above and below your ship. It's especially effective if you have the Option.

FORCE FIELD (F)

The Force Field acts as a barrier to incoming ships and weapons. It can take three direct hits, but then it is lost. When the action gets super hot, it's nice to have the Force Field. Just remember that you won't be able to charge through an area in safety.

NEMESIS

A Hostile Universe

The enemies of Nemesis are fast, numerous and relentless. They try to stop you either by crashing into you or firing weapons. They always appear from the same places, which gives you an edge if you remember the locations.

SUPER CODES

Special codes strengthen your ship or make the game more of a challenge. Each of these Power Options can be used once in the game, except for the Power Down, which can be used whenever you want. To use the codes, always hit Pause (Start) at the beginning and end of the entry sequence.

FULL POWER-UP

The Konami code Up, Up, Down, Down, Left, Right, Left, Right, B and A gives you all the special weapons and defensive items.

SPEED & FORCE FIELD

To power up with the Force Field and max Speed, push Pause, the B Button five times, the A Button five times and resume.

ALL ENEMY CRUSH

This code destroys all enemies on the screen, except boss enemies. Push Up, Right, Down, Left, Up, Right, Down and Left.

FULL POWER DOWN

If you want a real challenge, this code takes away all your ship accessories. Push the A Button then Left and repeat the sequence four more times.

NON POWER-UP

This code prevents you from powering up your ship. Push Up, Select, Down, Select, Left, Select, Right and Select, then repeat twice more.

Hover off to the left at about the height of the volcanos' peaks and fire continuously at the erupting boulders until the action cools down.

SUPER BIG CORE

There's limited space in which to maneuver, so head down to the lower left corner to avoid the giant ship's onslaught.

Shoot it at this point!

STAGE 2

INNER SPACE

START

UNFRIENDLY GREETING

Duck under the oncoming Fu Shuttles then pop up and blast the Fu Mothership in the center.

THE LOW ROAD

Squeeze through this crowded area by keeping a low profile. Stay close to the bottom of the screen to avoid the Cancer enemy's shots and the many other foes.

BONUS STAGE

Defeat the Cancer enemy with Double and Option fire. Once it flattens out, fly up to it to reach a Bonus Area!

CROWLER

The huge jaws of the Crowler release powerful shots. Dodge them and fire repeatedly into the open mouth for victory.

STAGE 3

EASTER ISLAND

START

MOUTHING OFF

Moais seem to be related to the mysterious statues from Easter Island. They are vulnerable to shots when their mouths are open. Stay near the bottom at first and clear out a path.

Fire when the Moai opens its mouth.

TRICK SHOOTING

Moais facing right are more of a problem. Use the Double against them, firing up toward their noses while still to the left of them.

The angle is critical.
Defeated Moais disappear!

ZAPPING THE ZAG

The Zag Ships join together then fly apart in a puzzling attack. They are most vulnerable when separated. That's when you should concentrate your attack on individual ships, defeating them one by one.

STRIKER

The Striker has a weak spot just above the beak-like structure. As always, you'll have to dodge the attacks of the enemy while lining up your shots.

Aim just above the beak.

NEMESIS

Stage 1 is filled with mountains, volcanos and enemies. Concentrate on building up your ship accessories quickly. By the time you reach the volcanos you should be fully charged and advancing ahead.

TO THE END

ACTIVE VOLCANOS

Hover off to the left at about the height of the volcanos' peaks and fire continuously at the erupting boulders until the action cools down.

SUPER BIG CORE

There's limited space in which to maneuver, so head down to the lower left corner to avoid the giant ship's onslaught.

Shoot it at this point!

You've entered the internal passages of a vast interstellar being whose antibodies will try to repel all invaders. Enemy spacecraft are also swarming within the membrane walls. The narrow central area is particularly dangerous.

TO THE END

BONUS STAGE

Defeat the Cancer enemy with Double and Option fire. Once it flattens out, fly up to it to reach a Bonus Area!

CROWLER

The huge jaws of the Crowler release powerful shots. Dodge them and fire repeatedly into the open mouth for victory.

No one knows how these artifacts from the South Pacific reached this forsaken planet, and the Moais themselves don't seem too happy about it. While concentrating on the heads, don't forget the other enemies.

TO THE END

ZAPPING THE ZAG

The Zag Ships join together then fly apart in a puzzling attack. They are most vulnerable when separated. That's when you should concentrate your attack on individual ships, defeating them one by one.

STRIKER

The Striker has a weak spot just above the beak-like structure. As always, you'll have to dodge the attacks of the enemy while lining up your shots.

Aim just above the beak.

START ▶

MINDLESS METEORS

The Meteors are simply chunks of space debris. They can't be destroyed, so don't try. Dodge them while concentrating your attack on the swarming enemies such as the Blitz Ships that attack from the rear. Later in the stage, watch out for Meteors between the towers.

PARANOID ANDROIDS

These Paranoid Android Ships hide in the bones and debris of Stage 4. When you close in, suddenly three of them will burst out and attack.

They come in threatening threes.

Watch for Paranoids to appear near the ledges in the middle of the screen.

CLEAR ENEMIES

From time to time one of these screen clear capsules will appear. Touch it and destroy all enemies.

Look for this Screen Clear Capsule. It often appears next to a Power-Up.

Once you've claimed the Screen Clear, all enemies that were on the screen are now in video game limbo.

10280

START ▶

MEMORIZE ENEMY PATTERNS

The Punisher and Roller Ships at the beginning of Stage 5 always appear in the same locations. The same is true of the Hoppers that appear once you pass the Dee Guns. To help defeat this mass of armament, use the Option and Double for the extra fire power it gets the job done.

Enter the area slowly and cautiously with Missiles firing.

Use the Option to clear a path.

Hoppers appear from the walls, ceiling and from the rear!

CODA CONDUCT

The Coda is a sort of mechanical mountain that grows from the floor of Stage 5. Attack low to the ground or with Missiles, or both, to take it out. As soon as the Coda begins to grow, begin your assault. The bigger the Coda, the more dangerous it is.

Codas attack if left on their own, so it's best to hit them early and hard.

Missiles range downward and impact the monstrous machine where it does the most good. Double Missiles will help.

Once the Coda is destroyed there's no time to celebrate. Several more are just ahead.

INTO THE BONUS STAGE

There are several Bonus Stages in Nemesis. One of them has an entrance at the bottom of this narrow passage.

The Re-Bone ship appears when you enter the narrow passage and head downward. Use your Missiles and Cannon to blow it away.

Once the Re-Bone is zapped, drop straight down and into the Bonus Area. Shoot the wall in the Bonus Area to find the spot where you can pass through.

TWIN ATTACKERS

Once you've made it this far, you don't want to lose it all to the pair of brute ships that try to keep you from reaching the end. Use the Option to double the shots you fire and spread out your attack.

RECKLESS

For 10,000 points you'll want to destroy this giant fortress, but it won't be easy. Carefully position your Option beneath the ship and use it to attack the Missiles that appear from the base of Reckless. Meanwhile, shoot the eye just beneath the top.

This high tech world is the most dangerous of them all. It is the home of all the fighter ships you've faced. The spaces are tight here, making maneuverability very important. Get Max Speed, Max Missiles, Double Options and the Double to help you conquer the innumerable dangers and reach the Mother Computer.

DOUBLE MISSILES

With the Double and Maxed-out Missiles, you'll be able to deal with the Dee Guns that line this area top and bottom.

BLOCK SHIPS

Duck out of the way of these hurtling Block Ships.

Time your dash through the gaps carefully. If a Block Ship catches you in a gap you'll be squashed.

Dart into the gap as soon as a Block Ship zips by. On the far side, get out of the way fast.

MOTHER COMPUTER

If you have Force Fields, you can ram the Mother Computer until its diodes fizzle.

Dodge the computer's chip shots.

Good work. You've freed the universe. Now try it with Full Power Down for a real challenge.

THE UNDEAD NEVER DIE

Some vampires just refuse to die, like the Dracula of Konami's Castlevania series. This Game Boy addition to the family has all the elements and excitement of the NES versions and a challenge all its own. With whip in hand, you'll hunt vampires and ghouls in the time-honored fashion. Some of the other items, however, are used differently in this version. As for the look and feel of the game, it's Castlevania all the way.

As always, you'll attack using your whip. You can stand and whip, crouch and whip or even jump and whip. Timing is critical because the whip action is a bit slower than on the NES.

The jump attack is the most difficult because it requires practice and excellent timing. To whip at the high point of your jump, push the B Button immediately after you jump.

EXTRA LIVES

In this first stage there is a Life Loop that allows you to add extra lives. At the beginning of Stage 1 leave the first candle and hit the 11th candle for a 1-Up. Then, at the top of the fifth rope keep climbing into the ceiling. Take the 1-Up and other prizes there. Allow your character to lose a life and repeat the process. Each time you do so you'll add one life to your total.

At the top of the rope you'll climb into the wall and discover a hidden room. The 1-Up is waiting.

The 11th candle is a 1-Up. If you've left the first candle.

Let your character die off and start again. Each time you do so you'll net an extra life.

The stages ahead are fought with hideous dangers and you'll need all the extra lives you can get. Use the Extra Life Loop to build up a dozen or more extra lives to see you through to the end.

HELP IN DARK PLACES

The items you pick up along the way will help you defeat the armies arrayed against you. Many look similar to items in other Castlevania games, but they are used automatically and you can't choose when to activate them.

HEART

Grab a Heart to boost your Life Meter by several sections.

FLASHING HEART

Flashing Hearts refill your entire Life Meter, but are harder to come by than regular Hearts.

CROSS

Once you pick up the Cross you will become invincible for several seconds.

1-UP

The 1-Ups add one life to your current game. Many are found in hidden rooms.

CRYSTAL

The first crystal gives you a Morningstar (chain whip) while the second crystal gives you Fire Balls.

COINS

The Coins gathered along the way will add 50 points to your overall score.

CASTLEVANIA: THE ADVENTURE

LURKING DANGERS

A new batch of beasties is on the prowl, guarding the grounds of Castlevania. Learn their strengths and weaknesses and the patterns of their movements before entering into battle. In addition to these foul folk you'll

encounter guardians at the end of each stage. Defense strength is the number of hits needed to defeat a creature. Attack is the number of hits it inflicts on Simon.

MUDMAN

Stages 1 & 3
Defense 1
Attack 1

The Mudman drops from above like a splat and slowly takes on a human form. Hit him low when he first lands on the ground.

EYE

Stages 1 & 2
Defense 1
Attack 1

Quick reflexes will defeat the rolling Eye. Watch for them when you climb ropes. In some cases you can jump over them.

CREEPER

Stage 1
Defense 2
Attack 1

The Creeper shuffles along like an animal. If you hit it with the whip, it jumps at you. So be prepared to hit it twice.

EAGLE

Stage 1
Defense 1
Attack 1

Eagles pass overhead, then dive and attack from behind. Always turn to face them and use the whip while standing firm.

BAT

Stages 1, 2 & 4
Defense 1
Attack 1

Unpredictable flight patterns make the bats very dangerous. Look for a Cross in the vicinity or stand to one side.

SPITTER

Stages 2 & 4
Defense 4
Attack 1

The balls that Spitter fires at you will bounce around the chamber until you hit them. Dodge and run on by if you can.

NIGHTSTALKER

Stages 2 & 4
Defense 5
Attack 2

The boomerangs follow two patterns. High to low or low to high. To evade them, duck high throws and jump over low throws.

WORM

Stage 3
Defense 2
Attack 1

Whenever you encounter these creeping Worms make sure you finish them off. Use Fire Balls and watch your step!

KNIGHT

Stage 4
Defense 2
Attack 1

In the hall where you meet the Knights, leave the items and concentrate on not getting sandwiched. Attack the rear Knight first.

STAGE-2

START ▶

You should be able to clear the dangers in Stage 1 using the tips below. Now with every step the journey gets harder. Bats, Spitters and the Nightstalker haunt this second stage, calling for new strategies. As you enter for the first time, go slowly, noting where the enemies lurk in the shadows before charging ahead. Don't try to battle them all. Sometimes it's better to skip ahead and save your energy. The same is true for collecting items. If you've collected extra lives in Stage 1 then you won't have to reach some of the dangerous candles here.

OUTSMARTING THE ENEMY

The Spitter is difficult to defeat. It has a clear shot at you, and you can't move fast enough to avoid all of its attack. Stand on the ledge to the left of the Spitter and whip the shots. When it stops spitting at you, move in and attack the Spitter directly. Having the Morningstar will speed up the process considerably.

Watch the timing of the Spitter's shots to know when to attack.

STAGE-1

Your quest begins outside the castle, then leads up the giant stairs. Even here, far from the inner terrors, you will find little peace. Mudmen and Eagles drop from the sky. Eyes tumble down on you as you climb, and Bats hover about your head. But you can gain great advantages here, too. Collect extra lives and power up your whip so that you have both the Morningstar and Fire Balls. Learn the attack movements of monsters, and how to outwit them. Then you will be ready.

MASTER THE MUDMEN

Mudmen aren't much of a threat if you know how to deal with them. Once they drip down from above and land on the ground, they'll begin to grow into human form. Hit them when they're still growing. If you don't attack them, they will follow you and may sneak up from behind when you're battling another enemy.

When the Mudman splats on the ground it is no more dangerous than a mudpie.

START ▶

HIGH AND AWAY

Sometimes the candles are placed in positions that seem impossible to reach. In fact, you can't reach all of the candles, but you can still knock them out and take the item. Claim the candle shown here by using your Fire Balls while standing on top of the wall to the left, then jump down and retrieve the item.

You'll never be able to reach this candle, so use the Fire Balls.

Crouch and whip to defeat the Mudman before it has a chance to take shape and attack you.

SECRET ROOM

At the top of the fifth rope is a secret room where you'll find a 1-Up and other items. Keep climbing into the ceiling until you reach the room. This is just the first of many hidden chambers in Castlevania.

BRIDGES OF PERIL

Crossing the bridges is one of the most dangerous prospects in the game. Enemies will attack from both sides, but you can't always fight back. The problem is that if you defeat them, they'll leave a hole in the bridge. Instead, jump over them, then turn and use your whip once they are behind you. At the same time you will have to deal with rolling eyes. Make sure to jump early enough to clear them.

SECRET ROOM

On the fifth ledge of this chimney you will find four steps. Stand on the third step down and attack the Eye when it rolls toward you. If you defeat it, the rope that was hidden here will take you to the Secret Room.

Stand on the third step down and use your whip on the Eye.

Climb down to the Secret Room and its valuable items.

THE STEPPING STONES

Jumping from block to block looks easy enough, but it takes time and patience. You'll have to stand right on the outer edge (right side) of the block and jump. If you fall off, return to the left and start over. A few of the candles below the blocks are valuable, but it's more important not to waste time. Some of the wider blocks fall away when you land on them, so you must immediately jump again.

THE GIANT

This servant of Dracula is huge and strong. One knock of his club can put you out of action. But you are quicker. By ducking in close, whipping, then darting back a step, you can defeat him. You can also use the ledges above to jump over him and attack from the rear, which is even safer.

Once you've whipped the giant, step back out of the range of his attack. Then do it again.

THE DRIPS

The Poisonous Slime appears in the holes and drips down on you. As soon as they appear is when you must strike. There are twenty of the Slime enemies to defeat, which will keep you on your toes.

STAGE-4

Your journey into the upper reaches of Castlevania has just begun. Spikes, falling stones and a host of enemies will beset you. The stage is longer than any before and the dangers are greater. You'll have to race against the clock while taking care with each step.

DEATH BAT

END

Learning the attack pattern and safety zones in this chamber is the key. Stand below the boss when it is hovering in the air. Its attack will be toward the opposite side of the room. When it comes down, move quickly across the room and whip. Then it will fly up again. Repeat the same strategy on this side of the room.

SECRET ROOM

About half way up the rope is the entrance to the secret room. Jump off and go inside for the 1-Up and items.

PINS & NEEDLES

The hazards in this long stretch are many, from falling stones to attacking enemies. The worst may be the spikes that can suddenly end your quest. Don't hang around admiring the view. Move as quickly through the area as you can.

MORE SPIKES

Watch for the patterns of the spikes as they shoot out and time your run to miss them. Practice and observation are the keys, but luckily there's a 1-Up just ahead in the secret room. Once you've mastered the timing, hurry through!

Leap to the rope as quickly as possible to avoid the Eagles.

Climb high then jump to the ledge.

Jump up to attack the Eagle.

The blocks will fall as you jump, so move quickly.

THE SKY IS FALLING

This area is a real headache, especially if the ceiling smashes into your head with its brutal spikes. Speed is your best weapon. Don't stop to get candles on the way. Your goal is the giant screw that brings the roof down. You must destroy it and move on.

Use the whip to break through the giant screws that bring the ceiling down. You won't have long so it's best to have the Morningstar.

START ▶

CASTLEVANIA: THE ADVENTURE

STAGE-5

The final leg of the journey is at hand. Spikes, Knights, giants and a super secret room will keep you guessing at every turn. The most difficult jumps in the game await you, so be prepared to lose a few lives. Whatever you do, don't despair. You're almost home!

THE GIANT LIVES!

You thought you had seen the last of this monster, but now, almost at the end, he returns. Fortunately he hasn't become any wiser since your first meeting. Use the same strategy—getting in close, whipping, then dodging backward—to defeat him this second time.

DRACULA

Finally you have reached the Prince of Darkness. Your moment to attack comes when he is in the form of a bat. From the middle lower platform, wait until the bat moves to the left, then attack.

The platform shown is your base of attack. When Drac is more himself (and less of a bat), use the left and center platforms to evade him.

A LADDER OF SPIKES

Use the spikes as a ladder to reach the upper realm of Castlevania. When the spike is extended, jump to it, then jump to the next spike as it shoots out. Timing is absolutely critical.

SECRET ROOM

In this shaft there is a hidden floor and a hidden rope that lead to the secret room. Jump off the rope onto the invisible floor, then search for the hidden rope.

THE KNIGHT

The Knight is a persistent fighter who appears at random in the hallway. Attack as soon as you spot him because there will be a second Knight along any second.

A FLOOR OF SPIKES

Spikes in the ceiling and walls are not enough to satisfy Dracula. Now there are floors of spikes! Jumping over them takes skill and practice. One misstep will end your journey.

Environment

GIZMO'S GREAT GADGETS

Gizmo's got to grab some weapons in order to stop the evil Gremlins and their cantankerous cohorts. A super sharp Pencil is the most useful item that he'll come across.

PENCIL

The sharp and sturdy Pencil is essential for your Gremlin hunting mission. Use it swiftly and take down the evil creatures that have taken apart Clamp Centre.

Since Gizmo can't pick up the Pencil when he has another item, make sure that he grabs it first.

TOOL BOX

Climb inside this armored box and you'll be able to plow through five enemies without being damaged. Watch out for the Thorn, though, as one touch destroys the Tool Box.

CASSETTE RADIO

Give your enemies a dose of decibels with this powerful music machine. It'll only work once every time you collect it, so think before you use it.

HEARTS

You'll start with four Hearts full of energy. Collect a Small Heart to refill one of them and a Big Heart to refill them all. You've got to stay alive and keep fighting!

MASTER THE MANEUVERS OF THE MOGWAI

The only way to get around the four Gremlin-infested areas of Clamp Centre is to know how to tackle the numerous obstacles and traps set by Gizmo's offspring. There are five important techniques which will help you jump and fight to victory. Keep them in mind as you're playing.

DEFEAT TO THE BEAT

After you hit a creature with the Pencil, it'll be invincible for a fraction of a second. Know the rhythm and hit it again when it's vulnerable.

STAY IN ONE PLACE

Conveyor Belts try to pull you to the left or right. Jump quickly and lightly and you'll be able to offset their power.

JUMP AND SWERVE

There are some hard-to-reach areas in this torn up tower. If a platform is directly above a spring, for example, you'll have to jump up and curve around it in midair in order to get on top.

GET CLEARANCE

If gaps are covered by low blocks, you'll have to jump lightly in order to clear the area without hitting the blocks and dropping down.

FALL AND MANEUVER

You can control Gizmo's movement in midair. If there's danger directly below, move to the left or right and get out of the way.

GREMLINS 2

A CURIOUS CAST OF CREATURES

The four Gremlins have spawned their own evil creatures. The following list explains where you'll find each enemy, how many hits they can take (HP) and what their powers are. "Body 1/2", for example, means the enemy causes a half Heart of damage with body contact.

STAGE 1
IN THE STUDIO

A band of Gremlins led by the merciless Mohawk has taken over the programming on CATV. Gizmo's got to brave the obstacles in the studio and clear the airwaves.

START ▶

TOOL BOX SHIELD

Climb into the Tool Box and blaze through the studio. You'll be able to absorb five hits with no damage!

MAKE A RUN FOR IT!

There's a Girl Gremlin waiting below. When she starts walking to the left, jump off the platform to the right and keep running.

HAVE A HEART

Take this Big Heart before you meet up with Mohawk. You'll need the energy boost.

LEADER MOHAWK

Mohawk tosses out an endless barrage of Tomatoes. Avoid them as they bounce by and get in close with a Pencil attack.

TO MOHAWK ▶

STAGE 2
THE GENETICS LAB

This place is crawling with odd creatures, the strangest of which is the Bat Gremlin. Gizmo's got his work cut out for him as he tries to clean up the lab and take down the bat.

ANOTHER USEFUL BOX

Clear away the first few Gremlins from the comfort of this Tool Box shield, but try to avoid as many enemies as you can so that it lasts longer. Avoid the Thorn as well. If you touch it, the Tool Box will be busted.

TAKE THE LOW ROAD

Instead of climbing the stairs, avoid contact with some hard-to-beat foes and keep close to the floor of the lab here.

JUMP AND SWERVE

Jump off the right edge of the spring and work your way around the block in midair. Then move to the left and collect the Heart.

CATCH A RIDE

The moving platforms are tricky. You'll have to time them out and then jump before you actually see your target!

CURVE AND COLLECT

Here's another tricky jump. Spring off from the left side, then move to the right in the air and collect a Small Heart.

TO BAT GREMLIN ▶

A LONG LEAP

You'll need some spring-loaded power to get over this gap. Jump onto the right edge of the Spring, then blast off.

THE PENCIL IS PRIMARY

Climb to the second step from the top, then leap to the left and collect the Pencil. Once you have the Pencil, you can move and collect the Cassette Radio.

BEWARE OF THE BAT

Spring up to the top of this narrow platform and either knock off the Bat at the top quickly or avoid it. Energy is precious and you don't want to waste it.

STEP LIGHTLY

The lines of Thorns are very low here. Just tap the A Button and make shallow jumps to avoid them.

TRASH THE THRASHERS

As soon as you see the Thrashers, double back to the left and lure them into the pit.

SMOOCHER ALERT

If you don't make the tricky leap to the platform above, you'll have to deal with a Smoocher below. Watch it!

TRAPS-A-PLENTY

LEADER DAT GREMLIN

When you're directly under the mutant Bat Gremlin, it will quickly swoop down. Run to either side and swipe it with the Pencil when it gets to your level.

STAGE 3 THE SYSTEM CONTROL CENTER

It should be no shock to Gizmo that the Electric Gremlin has been buzzing around the Clamp Centre System Control. He's got to put a stop to it before everything goes haywire.

START ▶

GO DOWN EASY

As soon as you climb into the Tool Box, move to the right without jumping and avoid the Thorn.

TROUBLE AT THE TOP

There's not much incentive to take the upper passages in this area. You'll encounter fewer hazards and you'll be able to move on more quickly if you stay on the floor.

FOLLOW THE MOVING BLOCK

A block travels in a criss-cross pattern here. Catch a ride and make sure that you leap over the single Thorns while riding, then duck under the double Thorns.

FIREBALL FRENZY

Buried Gremlins shoot Fireballs in sets of two. Leap over them in an open area, then approach and attack!

LAST CHANCE

Make sure that you grab the Small Heart on this platform before you take on the Electric Gremlin.

TO ELECTRIC GREMLIN ▶

GET AROUND

It's essential that you pick up the Pencil at the beginning of the stage. Jump from either side of the Spring and work your way around in the top of the platform.

KEEP MOVING

The big Gremlin in the center of this area is unbeatable. Get by with the Tool Box.

TOUGH JUMP

If you don't leap lightly over the Thorn pit, you'll hit the platform above and fall in. Jump from the right edge of the block and be extra careful.

LEAPIN' MOGWAI

It doesn't look difficult, but this is the most hazardous jump in the stage. If you don't leap just right, you'll fall and have to start from the beginning.

LEADER ELECTRIC GREMLIN

Don't get zapped when the Electric Gremlin is in his lightning state! The only time you'll be able to hit him is when he's in true Gremlin form.

STAGE 4 THE CLAMP CENTRE LOBBY

The Gremlins have gathered in the lobby and they're about to launch an attack on the city. Gizmo's got to defeat their leader before night falls and they're let loose.

START ▶

SHARP ATTACK

Leap over the Thorns in this series of hazards and fall to the left to land on the Springs. Then jump and fly to the right.

HAMMER TIME

There's a Hammer-wielding Gremlin who hits Rocks in your direction here. Jump over them and keep running.

INVISIBLE GIZMO

Collect the Radio and keep the music note over your head. You won't be able to see Gizmo in the Pass-through blocks, but you will be able to see the note above his head.

BIG HEART

Be sure to collect this Heart if you can.

THORN TROUBLE

There are a ton of Thorns at this end of the lobby. Take it easy and jump lightly over low-ceiling gaps.

TO SPIDER GREMLIN ▶

JUMP AND SWERVE

You've probably mastered this maneuver by now. Hit the Spring and curve around to the right.

CONVEYOR CHAOS

The very narrow Conveyors are surrounded by Thorns. Jump quickly and lightly on the belts to avoid getting pricked.

DON'T DROP

The center path is safe and save. Jump to it and avoid the trouble on the floor.

UP AND AROUND

Leap lightly off the Spring here and work your way to the left at the peak of the jump.

LEADER SPIDER GREMLIN

THE HUNT FOR RED OCTOBER

A Daring Defection Awaits The Atlantic

Publisher Hi Tech Expressions Design and Program © 1991 Beam Software TM & © 1991 Paramount Pictures

THE ULTIMATE TWO-PLAYER BATTLE!

As the Red October attempts to clear eight sections of the Atlantic and dock in an American port, the Soviet Fleet tries to thwart the mission by destroying the Sub. In a two-player game, one player controls the Red October and the other player is in charge of the Soviet Fleet. The twist makes the game unique.

The Red October takes aim on the Soviet Fleet.

Huge enemies wait at the end of every stage in a one-player game.

UNDERWATER ARSENAL

There are several special items that the Red October can collect and use in addition to its endless supply of Torpedoes. In a one-player game, the Soviet Fleet will destroy these Pickups if they're not collected quickly.

Homing Missiles

These explosive devices are very useful against quick vessels.

1-Up

Earn more chances to pilot your Sub to victory by collecting Hearts.

A Game Link Duel

While the one-player mission is thrilling, this game is at its best with a two-player Game Link. One player pilots the Red October while the other one takes charge of the Soviet Fleet. The match-up charges the room with excitement and always makes you want to go one more round.

Cavitation Drive

Run silently for about 11 seconds by using this top secret tool.

Repair

Restore the Sub to full operational capacity with this powerful Pickup.

THE HUNT FOR RED OCTOBER

STAGE

This relatively simple stage should serve as a good training ground for the levels to come. Watch for two very shallow passages toward the end.

Run Silent, Run Deep

If you're piloting the Red October, you should activate the Cavitation Drive in this open area to allude enemy radar and Missiles from the ship on the surface.

Shallow Water

The Red October is forced to go to the surface in this area. If you control enemy forces, this is a good place to attack from the air.

The End of the Line

When you complete the first stage in a one-player game, you'll come across this giant Mine. It can be damaged only in the four Cannons which point diagonally. Avoid the Missiles which come from the Bulbs and aim for the Cannons with Torpedoes.

STAGE

The going gets tough off the east coast of Greenland. Huge icebergs in this area make it difficult to navigate for all sailors who brave these waters.

Surface Fight

Another battle in shallow water pits the Red October against a Soviet Destroyer.

Deep Water Sanctuary.

A sunken iceberg forces the Red October to take either a deep route or a surface route in this area. Go deep and avoid the Aircraft Carrier above.

STAGE

Now that you are south of Greenland, the terrain is much more open. If you control the Red October, you should stay deep to avoid trouble brewing on the surface.

A Massive Machine Awaits

This computer controlled command center rivals even the Red October in technological accomplishments. Cross the paths of the lasers when they are temporarily switched off and wage war on the brain of this domed wonder.

Surface Tension

A huge reef forces the Red October near the surface and makes it an easy target for enemy forces. The Red October will have to be quick and cautious here.

This fortified compound is equipped with two Guns on top and four unbeatable Cannons on the sides. The Cannons can lay waste to the Red October with one piercing shot. Avoid

them at all costs and aim for the Guns. Then go low and seek out two panels on either side. Once you destroy the panels, you'll take down the whole shooting match.

Head-On With Heavy Artillery

GAME BOY

STAGE

4

The huge rocks are here for more than just decoration as will be evident by the sunken ships on the ocean floor. Proceed with caution.

Close Quarters

There's very little room to maneuver here. If you control the Red October, you may be better off by passing up the Pickup in this area.

Safe Spot

Make sure to duck into this cave-like area and collect a 1-Up while you're shielded from enemy fire.

Journey to the Command Center

This huge machine is very much like the domed Command Center at the end of Stage 2. This time, though, there are two computer brains. Avoid the lasers on your way up and take out the computers one at a time.

STAGE

5

You may have stumbled upon the lost ruins of Atlantis. The only way you'll ever stake your claim, though, is by surviving this dangerous location.

Aircraft Alert

Since the Red October is forced to be close to the surface in this area, the nearby Aircraft Carrier should be a major concern. Watch for fast Jets with powerful Guns.

Missiles Away

If you're in command of the Fleet, you should use 'Copters and Jets here, but watch for the Sub's Missiles.

The Monster Mine Attacks

The computer-controlled machine at the end of this stage is like the Mine at the end of Stage 1. Now, though, there are Alpha Subs equipped with Homing Missiles patrolling the area. Take them out if you can. Then go for the diagonally aimed Cannons.

STAGE

6

Most of the passages of this deep sea section are very narrow. Take your time in getting through them and collect the Pickups near the end.

Home-In on the Hovercraft

This surface battle pits the Red October against a Hovercraft. Missiles should be the weapon of choice for either vessel.

Beware of the Mighty Cannons

This new variation on the compound at the end of Stage Three includes two extra Guns on top and several circling Subs. As it was before, though, your main concern should be avoiding the shots from the Cannons and taking out the Panels on either side.

THE HUNT FOR RED OCTOBER

STAGE

7

This section of the South Atlantic is the underwater equivalent of the Grand Canyon. You should move along quickly in these wide open spaces.

Creep by the Carrier

The Red October is forced by the terrain to travel close to an Aircraft Carrier in this area. Use the Sub's Cavitation Drive and try to pass undetected.

Dangers Abound

Several huge compartments with tons of troubling weapons await you here. Go low first and take out the Cannons that produce

Sub-lifting Buoys. Then aim for the Mines and you'll trigger open the compartment doors.

If you hit the Buoys, you'll float to the spiked roof.

Take out the Mines and the doors will open.

STAGE

8

Oil rigging off the Florida Coast serves as an obstacle in this stage. Carefully steer through the tough spots and make your way to the shore.

Route Through the Rigging

The dark oil rigging supports are far enough away that they will not hit your boat. Avoid the lighter poles, though, or you'll be belly up in no time.

Cool-Off in the Cave

If you're playing a one-player game, you should explore this cave, take a breather from the enemy and collect the last two Pickups before you approach the final battle.

Showdown With the Enemy

It's all come to this. One more victory and freedom will be yours. This battle is super-tough. First you'll wind around narrow catacombs with deadly drops of Oil falling from above. Then you'll have to take out four cir-

cular panels as Guns and Cannons fire away. Freedom does not come easy for the crew of the Red October.

Deadly Drops

Time the drops of oil and sail by when the area is clear.

Guns and Cannons

As a last ditch effort, the enemies have amassed their remaining fire-power. Blast what you can and avoid the rest.

Shoot Out the Lights

Destroy the four circular light panels on the girder and America will greet you with open arms. Congratulations!

R-9 Rocks Heavily

The R-Type, an R-9 class space vehicle, is small but powerful. Your mission is to pilot it through the alien masses and stop them at the source. If you manage to avoid enemy fire and collect Power-Ups, you'll be able to accumulate as many as two Plasma Forces and a versatile Power Pod.

Blast Away

You can press the B Button quickly and repeatedly to shoot rapid-fire Beams or hold the B Button until the strength of the Beam grows, then let go for a super powerful shot.

Rapid-fire shots are the best offense against small aliens.

Use a super shot when you go up against stronger aliens.

STAGE — 1

The gateway to the alien base is guarded by a small troop of low-level creatures and a few advanced aliens. You should be able to get through the stage and collect plenty of Power-Ups in the process. Make sure that you get a Power Pod before you reach the Gladiator and the last battle of this stage will be a breeze.

GLADIATOR

One of the links of this mechanoid chain is different from the others. Destroy that one and they'll all stop firing.

GLADIATOR

Send the Power Pod to the stomach of this evil alien and let it blast away as you seek safety from the Gladiator's Bubble bursts.

R-TYPE

STAGE

2

Some creatures in this stage may surprise you by leaping out of the alien ooze. Build your Beam to a super blast and let them have it as they

emerge from the murk. Then, when you reach the Gomba, aim for its weak spot on top.

STAGE

3

The leader of Stage 3 is so huge that it alone is the stage. Hit the Power Shuttles near the mouth of the Crusader and make sure that the R-Type is equipped with the Fire Chain before you begin your dangerous mission below the ship.

Use the Fire Chain to knock out the guns and engines under the Crusader.

CRUSADER

Blast the guns at the rear of the Crusader. Then, when the big gun on the inside stops firing for a moment, get in front of it and blast away.

STAGE

4

The maze-like machine works of the alien ship are packed with floating mechanoids. Instead of trying to defeat them, just get out of their way and find a clear path. They are much too strong to destroy in the short amount of time that you'll see them approaching.

BALDO GARDENS

There are several creatures in this enclosed space.

The weak points of the creatures are to their sides.

SOLAR STRIKER

Defend The Solar System From Alien Tyranny

TM & © 1989 Nintendo

STAYING ALIVE IN A LASER STORM!

R**Rule 1: Know the Enemy's Patterns**

U In most fast-action shooting games you have only a few split seconds to think and act. In SolarStriker, the enemies always appear in the same parts of the screen and follow set patterns of movement. Memorize those patterns and you'll be able to wait in prime position, already blasting away when the scum pop onto the screen.

**R****Rule 2: Scoring Big Points For Extra Lives**

U Every alien you hit in SolarStriker adds to your total score, but what good is a high score? For every 50,000 points tallied, **E** you'll earn another 1-Up, so points really do matter. You should also look for high **2** scoring aliens. For instance, if you hit the Comets ten times, you'll vaporize them for 5,000 points.

**S1**
1G
E

STELLAR

Your great mission begins amidst the comets and asteroids of outer space. Wave after wave of spinning, dive-bombing aliens sweep in, but most can be destroyed just as they appear on screen.

Your first close encounter is an easy one. Just fire from the spot shown.

Stay in the middle and the aliens will fly into a blistering trap.

Hit this P symbol for the Double Shot.

Hit two more II symbols for the Triple Shot and twice more for Turbo Missiles.

EPIKHN

The first major challenge is waiting at the end of the stage—a giant ship called the Epikahn. Three lines of fire shoot out at your spaceship as the Epikahn moves back and forth across the screen. Dodge the enemy fire and shoot for the middle to claim the 5,000 victory points.

Hide out in the safety zone shown above, but if the enemy scrolls by, you'll have to face it later.

S2
2G
E

OZONE

In the upper atmosphere of enemy-controlled Earth, you'll fly smack into Batwing Fighters, Rotomechs and Pinchers. The action is fast and furious, so you should try to earn the Double or Triple Shots if you don't have them. Stay near the bottom of the screen to gain extra time.

Hover near the right side of the screen as shown. You'll be in the perfect position to incinerate the Reticulon menace.

DESTRUCTOR

Destructor is an enormous jet fighter that moves in circling, looping patterns across the screen. Its Bubble Bombs are worth 100 Points each if you hit them, so gun for it. Dodge the Bubble Bombs and stay near the bottom of the screen. When Destructor moves toward you, head to the left.

When Destructor is above you, fire away, especially toward the Bubble Bombs.

If Destructor comes after you, hide in the safe spot on the left.

Resume your attack from beneath the enemy when it moves up the screen.

SOLAR STRIKER

3

CITY

A whole new world of potential disasters waits for you once you enter Stage 3. Now you're flying over the surface of Earth, but it is controlled by the invaders. Enemy aircraft and ground-based weapon systems are tracking your every move. You'll have to keep an eye on the ground while dog-fighting with the alien aces in the air. It won't be easy, but you're the only hope for Earth.

The Tanks are slow, but they shoot dangerous lasers. Timing is important.

The Terra Cannon is particularly tough. Ten shots are required to knock one out.

The aliens appear on the six roads in predictable patterns. Be prepared for them.

ULTRA CRUSHER

The Ultra Crusher is a slow moving Leviathan tank that shoots with lasers as it rumbles forward and sideways from road to road. Attack from the bottom of the screen.

The lower left corner of the screen is the safety zone. If you hide there, Ultra Crusher moves on and you clear the stage.

5

OUTER BASE

The huge base of the Reticulonians is well protected from Earthly retribution. You'll be flying into the center of their forces, which are led by the Xenocrypt. The Xenocrypt is really four robotic weapons that join together to form an awesome laser force. Your best strategy is to blast them when they break apart and move separately. You can earn up to 12,000 points against this enemy.

Each of the four sections fires a laser.

SUPER CANNON

The vast cannon complex guarding the core of the base has a single weak point—the electronic eye at the center. You'll have to dodge bombs and laser attacks to get a shot. The large cannon shoots lasers while the smaller weapons fire bombs.

Prime position is the center of the screen. Fire at the cannon's eye.

The safety zone is shown here, but if you don't fight you won't earn mass points to earn extra ships.

4

DEATH VALLEY

Flying over the parched deserts and canyons, SolarStriker runs into a posse of Reticulonian aerial armor. Maintain your multiple shots at all cost and prepare to meet the Omnidquad, which is as tough as most stage-end bosses. Aim for the pods of the Omnidquad first, then zero in on the soft center.

The pods of the Omnidquad orbit around the center, then stop, then orbit.

Once the Omnidquad goes down in flames, still more enemies swiftly counterstrike.

NUCLEON

This mysterious mechanical monstrosity is surrounded by invincible satellites that fire at you. The center of Nucleon is the weak point, but you'll have to dodge continuously to finish it off with enough shots. Defeat Nucleon for 10,000 points!

The Nucleon moves about with its halo of satellites. Fire from below.

The safety zone is to the right of the Nucleon. Stay there to clear the stage.

6

BASE CORE

All forces have gathered to keep you away from the very heart of the alien empire. The Quasi Obliterator is a new fiend with a deadly twist—it separates into two sections that must be fought one by one. Then your old pal, the Omnidquad from stage 4, shows up again. In fact, the middle bosses from all the other stages have gathered here in defense of their leader.

Attack the sides of the Obliterator separately. There are no more safety zones.

Here in the final stage you'll revisit the enemies you thought you'd destroyed.

RETICULAE

The final challenge is the giant fly, Reticulæ, who shoots a spread of bombs. Don't get too worked up, though. It is easier than most of the other bosses. Just stay in position between the spread of shots and fire away.

A safety zone is between the shots to the right of the center of the screen.

TETRIS

EVERY BLOCK COUNTS

You'll have to take every piece as it comes in this puzzler and find just the right place to put it to succeed. These three rules will keep you playing.

Keep 'Em Low

If the stack reaches the top, you'll lose. Try to keep it down by placing blocks horizontally and to the sides whenever you can.

Don't Cap Gaps

Pack the blocks tightly and evenly across the width of the screen. Given a choice, you should try to keep gaps uncovered.

Keep Making Lines

If you complete lines as soon as possible you won't score a lot of four-line completions, but you will stay alive for a long time.

Seven Four-Block Patterns Form Tetris

There are seven different ways to arrange four squares with sides touching. Those configurations make up the Tetrad that fall in Tetris. Each Tetrad can be useful for certain kinds of situations. Study them and master their placements.

T-Block

This Tetrad is good to use while filling single block gaps and for placing on stair-like patterns. You can use it to complete up to two lines.

4-Bar

This Tetrad is the only one that will complete a Tetris; four solid lines formed with one move. You can use it effectively to fill long, narrow holes.

4-Square

The 4-Square is shaped to fill spaces that are two blocks deep. Try to work it into a low position and keep it from adding height to the stack.

P-Block

Fill holes that are one block deep and open to the right or holes that are two blocks deep and open to the left with this Tetrad.

Z-Block

This awkwardly shaped Tetrad can cause a lot of problems. Look for a two-block wide and one-block deep space that opens to the left.

L-Block

Reverse

This Tetrad is a mirror image of the L-Block. Use them horizontally and you'll be able to keep the stack low.

Z-Block

Reverse

The Z-Block Reverse is a mirror image of the Z-Block and it's equally difficult to place. Try to keep them under control.

TETRIS

KEEP AN EYE ON THE NEXT TETRAD

A box in the lower-right corner of the screen previews the next Tetrad to fall. Keep an eye on this box and make your decision on where to place the currently falling piece based on the one to follow.

EXAMPLE #1

The T-Block could easily fit in either space at the bottom of the screen, but the next Tetrad can only fit in the space on the right.

EXAMPLE #2

You could place the falling Z-Block Reverse in the open space to complete two lines. Looking at the next block, though, you'll see that if you wait to fill the space with the L-Block that's on its way, you'll be able to score three lines at once for more points and a lower stack.

EXAMPLE #3

While it's not good practice to cover up spaces, you can benefit from doing so when you know that you'll be able to quickly complete a line and open up the space again. Such is the case in this example. The L-Block covers a space on the left, then a T-Block drops to complete the line.

PRACTICE MAKES PERFECT

While the basic rules of Tetris are very simple, there are a lot of useful moves that you can develop to help keep the blocks under control and to build your score. Take a look at the following Tetrad-placement examples and keep them in mind while you are playing the game.

EXAMPLE #1

Make sure that you know what kinds of spaces the falling Tetrad are built for and that you place them accordingly. This L-Block fits very well over a two-block high stack.

EXAMPLE #3

In some cases, it looks like you may be covering a space when you are actually completing a line. Always watch the width of the screen and determine how a Tetrad will affect the stack.

EXAMPLE #4

Some placements that may look odd at first turn out to be good moves. This 4-Bar, for example, looks like it's covering a large gap. It really completes a line and makes the stack smaller.

EXAMPLE #2

You can keep the stack low by placing Tetrad horizontally. In this example, the L-Block Reverse fills a one-block space and makes the stack two blocks lower than it would be if it were vertical.

EXAMPLE #5

Here's another example of a Tetrad placement that looks like it's creating a gap but actually results in a line completion. Keep your eyes open and place the Tetrad wisely.

CLOSE THE GAPS

At times where you will have to temporarily cover open spaces, it pays to know what to do. Reopen the gap as early as possible.

Pack The Blocks

When covering a space, try to place the Tetrad as low as possible and close to other blocks.

Stay Away From Gaps

If there are gaps in your stack, try to arrange falling Tetrad so that they don't create an even bigger stack of blocks on top of them.

Position this T-Block Vertically so that it doesn't build on the gap.

Open Up The Spaces

When there are gaps, you should make moves to open them up as soon as possible by completing the lines that include the gap-covering blocks.

Complete the lines that include the gap-covering blocks and open the spaces.

PLAY IT SAFE

While four-line completions are great for your point total, they may sometimes be risky to attempt. It's a good strategy to save a one block-wide space for a 4-Bar, but you shouldn't let the stack grow too high or your game may end abruptly. When the stack gets above the comfort zone, change your strategy and start completing lines.

If you let the stack rise too high, you'll be buried.

Know When To Stop

When the stack of blocks has reached a certain point and you're still waiting for a 4-Bar to complete a Tetris, you'll have to shift your strategy and shorten the stack. The diagram below should give you some guidelines.

Try to keep the stack at this maximum height while going for a Tetris. When you're this close to the top, you should try to pare down the stack.

Leave Room To Maneuver

If you're going for a Tetris, it's a good idea to let the one block-wide gap open gradually to a two block-wide gap. That way, you'll easily be able to fit in Tetrad other than the 4-Bar and complete lines when the stack gets too high. Also, the stack on the other side should be the same height as the gap or a little higher.

Open the gap at the mouth and build away from it.

If your stack looks like this, you better hope for 4-Bars.

A wide opening will accommodate any Tetrad.

Cut the stack down when it gets too high.

TWIST AND SLIDE TO FILL SPACES

Even when spaces are covered on three sides, it still may be possible to fill them with the right maneuvering. Study these two techniques.

Slide 'Em In

Even after a Tetrad lands, you can slide it from one to five spaces, depending on the speed, before it settles. That will allow you to eliminate some out-of-the-way gaps in the stack.

Slide a Tetrad as soon as it lands to fill a gap.

Twist 'Em Around

If you know how the Tetrads turn and what spaces they fill, you can perform some amazing maneuvers at the last moment. Fit them in one way, then turn them as soon as they land.

Work this T-Block into the space vertically. Then twist it once counter-clockwise and fill the space perfectly!

A Quick Test Drive

Look at the following three playing situations and decide where you should place the falling Tetrads. The solutions are below.

Question #1

Question #2

Question #3

GAME LINK COMPETITION

During a Game Link match, you can send blocks to your opponent's side by making multiple line completions. It's a great way to lower your stack and raise their stack at the same time.

Know Your Opponent

The goal of a Game Link match is to complete 30 lines before your opponent or to get his or her stack to the top of the screen. Study your opponent's strategy and act accordingly.

A Tetris will send four lines of blocks to your opponent's side.

Keep An Open Space

The same one block-wide gap will show up in every line that your opponent sends your way. Open up the area above that space and you'll be able to complete the lines as quickly as they appear.

Open the spaces that appear in the lines that your opponent sends and fill them in.

Dr. MARIO

It's all fun and games
for Dr. Mario.

© 1990 Nintendo

STOMP OUT THE VIRUS VERMIN!

Vitamins, of either solid shades or two tones, begin to drop slowly, one by one, from the top of the screen. As they fall, manipulate them so that they match the shades of the viruses or vitamins beneath them. Begin clearing viruses from the screen by stacking three vitamins over viruses of the same shade. At first it's easy, but as the game progresses, the vitamins fall faster and faster. When you place the wrong shade over a virus, you'll have to stack them four-high to clear them and try again.

Dr. Mario tosses out the first vitamin. Let the game begin!

Before you begin, select the speed, music and level that you want to start with.

Match them up and move them out. Keep an eye on the doctor to see what's next.

Clear the viruses near the top first. When you get down to the last few, you'll have more time to position the vitamins.

Wipe out the last virus to clear the level, then press Start to immediately begin the next level. Catchy isn't it?

FIGHT VIRUSES WITH SIX DIFFERENT VITAMINS

Three kinds of viruses threaten to escape from the bottle. You and Dr. Mario fight back with six kinds of vitamins. You have three solid capsules, one white, one gray, one black, and three that are two-toned. By rotating them to fit your needs, you can often use one vitamin to cover two viruses. Press the A or B button to rotate the vitamin a quarter turn and stand it on end, or flip it over by pressing twice. Press four times to make a complete circle.

BASIC MOVES

#1

A basic and efficient move is to place a two-toned vitamin over a matching two-toned vitamin or over two matching viruses. It's a great move when you're near the top of the screen and have little time to manipulate the vitamin. You can simply move it over and allow it to drop. Before making any move, look to see what Dr. Mario is going to throw out next.

A white and black vitamin is about to fall. It will fit perfectly over the white and black viruses on the left.

Drop the white and black vitamin into place, then you can move the next vitamin, which is gray and black, to the far right.

#2

Plan ahead to see what you can set up. Sometimes you have to look down several rows to see how a move can work for you. If you can match half of a vitamin and let the other half drop onto a match below, you'll effectively use the whole thing.

You have a few choices in this situation. You might at first think that you can match only half of this vitamin.

Match the black half, as shown. Clear the black virus, and the white half with the next black capsule will drop to the white stack below.

#3

Now that you're used to looking down the rows to match stacks vertically, start looking across the rows for side-by-side matches. Just as with the vertical stacks, four of a color matched horizontally will clear a virus or a line. Lay a solid vitamin flat, or stand a two-toned one on end and slip it into a single space.

With the solid white capsule lying horizontally on the left, the solid white vitamin about to fall is a great match.

Slip the falling vitamin in beside the solid white one, as shown. It will make a four-color match to clear both vitamins.

TOUGH CHOICES

#1

Often it's obvious where you should put the falling vitamin. Other times, you have to decide quickly which of a couple placements would be better. In the photos below, for example, two places look like good prospects, and you have very little time to make up your mind where to make your drop.

Where do you want the gray half to fall? Keep in mind that the next capsule is a black and gray two-toner.

Tip it on end and drop it on the white stack. It will clear the whites and set you up to use the next vitamin.

#2

Decisions, decisions. And you just don't have time to get a second opinion! Should you stand the capsule on end to clear out the white stack or go for more points by setting up a more complex move? As long as you aren't too near the top, you can take a chance and hope that the right capsule combo comes up soon.

If you flip it on end, you can add to the white stack. You have another possible move, though.

Place gray on gray. Put the next vitamin on the right, and when you match another two grays, the white will fall onto white.

#3

Keep a step ahead of the game by plotting your next move before you set the vitamin down. It's especially important when you have more than one possible placement because it sometimes allows you to take advantage of this vitamin to set up a high-scoring double or triple with the next. It's like having a sneak peak at the future!

Should you put this solid white capsule above the solid white one on the upper left? Consider the vitamin to come.

Put it beside instead to clear all four white halves and open the space for the black and gray capsule. Score a double!

ADVANCED MOVES

#1 DOUBLE DOSES

When you're playing for points, plan your placements to take out as many viruses as you can in a single move. Try to set up a chain reaction that will ripple down or across the screen, wiping out bugs and racking up points. Not only do combination moves score big, they're fun to watch, too.

Where will it fit? You have a choice, but only one of them will yield a double. First, flip the black and white capsule over.

Place white on white, as shown, to clear the four white halves. The gray half will fall to clear the grays below it.

#4 TIGHT SPOT

When the screen is crowded with lots of vitamins and viruses, moving capsules to remote spots becomes more difficult. With skillful maneuvering, though, you can fit them into some very unlikely-looking spots. Be alert and search for possible landing sites that aren't immediately noticeable.

There's no good spot for this vitamin. Or is there? Try sliding it in between the two black and gray capsules.

Flip the capsule up on end and slide it down. At the last second turn it sideways again and slip it into place.

#2 MAKE MUSIC!

Be sure to crank up the volume before you make a massive sweep. If you manage to clear more than 20 vitamins and viruses at once, you'll get more than just a pile of points. Your Game Boy will begin to play a special (and familiar) tune that you won't want to miss!

It looks like you're building a dangerous tower, but with the right move you'll create a domino effect.

Tip the capsule on end, drop it on top of the black stack, then sit back and watch the action happen!

#5 OUT OF SPACE?

When you're too close to the top to drop vitamins that don't match there, you have no choice but to head towards the bottom. There might even be a good match somewhere down on the screen. It's getting there that's the problem. By turning the capsule here, sliding it there, you can zig-zag to your destination.

If you place this right on top, it might block your next moves. Find a path to get it out of your way.

Move it down, slide sideways, then stand it on end and slide it down. Turn it sideways at the last moment.

#3 SLIP 'N SLIDE

Just because a virus is low in the pack doesn't mean that you can't top it. With quick thinking and rapid reflexes, you can slip a capsule into out-of-the-way places. Making it fit sometimes takes fancy flipping and slick side-sliding, but if you have a mess near the top of the screen, moves like this can be game savers.

At first glance, it looks like this vitamin is just going to get in your way. Take another look.

There's a perfect place for it in the center. Let it drop, then before it lands, slide it to the right.

#6 HIGH SPEED!

Are you up to the challenge of Level 20—at high speed? You need limber fingers and lightning reflexes to clear the 84 viruses that reach almost to the top of the screen! If you make one wrong move, you're doomed. Like the NES version, Dr. Mario for Game Boy has animated scenes at the end of certain levels, and something special at the end of this one.

VS. PLAY

For twice the fun, try the two-player mode. Although the goal remains the same, with two players there is the added challenge of clearing the screen before your opponent does. Strategies change, too. It's more important than ever to make multiple matches because they impede your opponent's progress, but you'd better not take too much time setting them up.

FROM OUT OF NOWHERE

By clearing more than one virus at a time, you can make play difficult for your opponent. When you clear two, a vitamin half drops onto your opponent's screen. The more you clear at once, the more halves you send. Just remember that your opponent can repay the favor!

Try some bad medicine. Set yourself up to clear multiple viruses in a single move and send unwanted vitamin halves to your opponent.

Depending on where they land, the vitamin halves can help or hinder. If he's already in trouble, they can spell the end for him.

WHAT IS YOUR OPPONENT UP TO?

Each player sees the action from his own perspective, so you won't know how many viruses your opponent has left until the game is over. If you take too much time setting up plays, you might find yourself on the losing end.

How many viruses does your opponent have? You won't know until it's over.

You're looking good! What about your opponent?

Smart play and quick thinking pay off! Go for the best two out of three.

In the beginning, Player 2's view is much like that of Player 1. That will soon change.

Complications arise in Player 2's case.

EVENING THE ODDS

Games are the most fun when players are evenly matched. In Dr. Mario, players of different ability levels can have competitive matches by presenting the game at levels and speeds appropriate for each. By using the settings in tandem, play can keep things interesting.

It's time to work. There are no viruses left to create an infection.

It's time to work. There are no viruses left to create an infection.

C AMAZING TOMATO TO THE RESCUE E

Acclaim has created a puzzler in this maze game featuring a hip tomato with too-cool shades. With three play modes and dozens of baffling rooms

to clear, it's a challenge for even the most proficient puzzle solvers. Get ready to head 'em up and move 'em out.

■ Which Way Out?

Each room in the maze is filled with obstacles. Kwirk must make his way to each room's exit, which is no easy feat given the configuration of the obstacles. Some are blocks that you can push, others are turnstiles that flip certain directions. You must move them to clear the path.

■ It's the Pits!

The black spaces that you'll encounter in some rooms are pits. You can't cross them without filling them first with blocks of corresponding shapes. That's not as easy as it sounds, though, because you'll have to find a way to maneuver the right block to the right space. Begin by deciding which blocks will fit or fill which pit. As you fill the pits, you get more room to move around.

A black hole. You can't walk through or jump a pit. If you can't walk around it, fill it in.

When you place a block in the right pit, it will fill it in and give you more room to maneuver.

■ Tip the Turnstiles

The Turnstiles rotate 360 degrees, but they won't budge if there is something obstructing them. Figure out which direction you'll need to push the Turnstile to clear the way for your next move. Plan ahead to use them to your advantage.

■ Other Characters

Tomato Kwirk isn't the only vegetable in the patch. Sometimes other characters are in the room, too, and each will come in handy at some point. Press Select to activate them one at a time. To clear the room, all must reach the exit.

THREE BASIC OBSTACLES

Like revolving doors, this one swings around in a complete circle if nothing blocks its path.

Push blocks in the direction you want them to go. Avoid moving them right next to the walls.

Fill pits in with blocks of corresponding shapes. They must fit perfectly to clear the way.

GOING UP

LEVEL 1 FLOOR 1

If you're careful, you can complete the first room with as few as four moves. This is your opportunity to learn how to use the Turnstile obstacles. Start flipping them!

From below, move the door clockwise two quarter-turns.

Move the other door one turn counterclockwise.

Go around and push down on the left side. You're done!

HEADING OUT

LEVEL 1

In this room, which has a difficulty typical of Level 1, your obstacles are movable blocks. The room is small and has little space for maneuvering the blocks, so try to think through your moves before you begin.

Move down and shove the center square to the left.

Push the rectangle up.

Push the long block right and the rectangle back down.

LEVEL 1 FLOOR 2

Three blocks stacked vertically block your path to the exit. Your only choice is to push them to the side. If you begin with the wrong block, you'll have to start over.

First, push the top block to the way to the left.

Do the same with the lower block.

From below, push the center block up to clear the path.

Push down on the rocker door and move to the lower area.

Shove the block all the way up.

Rock the door back up to clear the doorway and the room.

In the Heading Out mode, players can challenge themselves to finding their way through a designated number of rooms. Time is ticking away from the moment they enter each room, and so are bonus points!

LEVEL 2

In Level 2, the rooms are more challenging and require more complex moves than they did in Level 1. When you have to rearrange blocks to fill the pits, try to match the shape of the block with the shape of the pit.

Slide the block on the left down and over into the pit.

Push the long block down, the square one up.

Shove the long block into the pit. Follow with the square.

LEVEL 3

You'll enter some mind-boggling rooms in this level! And yes, there really is a solution to each. Learn to look for clues to the correct sequence before you make your first move. You'll be racking up the bonus points in no time.

This room is crowded with turnstiles. Open them carefully.

Move the turnstiles on the upper right.

Do some fancy flipping to clear a path to the exit.

ASPIRATIONS

Dana is a magician's apprentice whose fondest desire is to earn the title of "Magician." To realize his dream, Dana must pass the hardest test of his life.

RITE OF PASSAGE

The challenge lying before Dana consists of 5 levels of 10 rooms each—50 new and different rooms in all! Dana must apply his magic skill expertly to reach each key that opens the door to the next puzzling room. He must master the arts of making and breaking blocks and playing with fire to be successful. And, as if the rooms aren't tough enough, Dana also faces time limits, limited lives, and numerous monsters. Some monsters can even break the blocks that Dana creates! But not everything he finds is bad—Dana will meet friendly fairies and find many items that will help him earn his title of "Magician!"

CLEARING LEVELS WITH DANA'S MAGIC

Walking, jumping, and ducking won't be enough—Dana's ability to cast magic spells is his key to success!

DANA'S BLOCK-MAGIC

Undoubtedly Dana's most versatile talent—he can create blocks in the spaces next to him at three different heights, depending on whether he stands, jumps, or crouches. He can even edge out to create blocks a space away. Dana can break blocks the same way, or jump up to smash 'em using his head!

FIRE-MAGIC

Each spell cast destroys one enemy. Dana can buy spells at shops and carry up to three at a time.

Magic Items That Will Help Dana

Magic Items can be found in shops or hidden in various rooms.

| | | |
|--|--------------|--|
| | Fire Ball | Each jar holds one Fire Ball—use it wisely to destroy an enemy |
| | Bell | Allows Dana to call one fairy |
| | Water Gun | Extinguishes one fiery Burn Flame |
| | Hammer | Used to break one Mirror or Camirror |
| | Hourglass | Adds more time to the timer |
| | Shoes | Allows Dana to run faster |
| | Hat | Lets Dana destroy blocks by "head-buttting" once instead of twice. |
| | Wing | Needed for admission to hidden rooms |
| | Gold coins | \$5,000 bonus |
| | Silver coins | \$3,000 bonus |
| | Jewels | \$10,000 bonus |
| | 1-Up | Gives Dana one extra life |

★ SPECIAL TECHNIQUES

Here are a few examples of special rooms that require some tricky techniques and special strategies to pass through them. Practice

these techniques, as Dana will need them throughout the game!

LEVEL 1 Room 6

The best way to deal with Sparkling Balls is to create a small block box. Then, wait until one enters, and seal it in!

LEVEL 2 Room 3

Get through this room by creating blocks in the spots that don't have Ogre's Seals—leap from block to block to the key and door.

LEVEL 3 Room 2

Use the unbreakable moving blocks platforms to leap from one level to the next. Jump onto them as they move toward Dana.

LEVEL 4 Room 10

Burn Flames raise the degree of difficulty here—try shrinking them with magic, then quickly jump over to safety!

★ HIDDEN ROOMS

Dana can find five hidden rooms in the game, one on each level. In each hidden room, he needs to find the hidden "Solomon's Seal". Find all five Seals, then see what happens!

DON'T GET QUARTHED!

To keep the shapes that drop from above from crashing into the Quarhdome below, the player pilots a Blockbuster ship and fires blocks at them as they fall. When the blocks and shape form a square or rectangle, they disappear from the screen. The ten shapes fall faster and faster as the game progresses.

BASIC STRATEGIES

Master the easy ones, like this L-shape, first.

Don't get trigger happy and pile up unnecessary blocks.

All shapes can be completed with just four sharp shots.

COMBINATION PLAYS

For more points and possible Power Boosts, take out both shapes at once.

You can clear the square first and then the rectangle to clear the screen.

But for more points, fill in the sides then the center and clear the combination.

Select Your Blockbuster

Which do you prefer? All have the same capabilities, but one might be your good luck ship.

Square MK 4

Earnest Beetle

Koubah Bahri

Ding the 3rd

Armament Pearl

Fickle Savior

POWER BOOSTERS

When you clear multiple shapes, you sometimes earn special Power Booster items. Each can be used only once, even though you might actually pick up more than one. Use them wisely!

1P · 2P Firepower

Increase the speed of the blocks you fire.

1P · 2P Time Out

Temporarily stop the shapes from falling.

1P · 2P Power Zap

Zap all shapes from the screen at once.

1P Slow-Mo

Save the day by slowing the shapes down.

1P Wild Card

Feeling lucky? It might help. It might hurt.

2P Dirty Trick

Speed up the rate of your opponent's shapes.

2P Triple Boost

Send your opponent triple-layered blocks.

QUARTH

STAGE 1

This is an easy stage that moves slowly. Practice your moves and collect lots of items.

Don't start in the middle; add rows left and right first.

Fill in the left side, the right side, then the middle.

Start on the right and sweep to the left with your blocks.

START ▲

STAGE 5

You've made it half way! The shapes are dropping quickly and they're more complex.

This one is easier than it looks. Use your blocks wisely.

There is more than one way to clear this combination.

Take the "O" shape as one. Clear "M" pieces individually.

START ▲

STAGE 9

It might be better to take these complex shapes apart instead of trying to farm one block.

It's a massive block! Take it out piece by piece.

Take these in small sections. Get them before they get you.

Hustle here. Go for a big block with the number nine.

START ▲

2-PLAYER GAME LINK ACTION

You have lots of chances to impede your opponent. For starters, clear big blocks to shorten his viewing area.

Players can select their own levels and stages.

Your opponent can make play more difficult.

your view of the screen restricted. Bummer.

When your opponent manages to clear many shapes at once.

You lose! Winged guardians carry you off to what ever.

Use the items you collect to hinder your opponent.

The winner triumphs! The most nimble Guardian wins.

It's playing head-to-head in the two-player mode. Speed pays off. Move through the stages as quickly as you can.

GARGOYLE'S QUEST

SET ENCOUNTERS

Some encounters in the overworld will always be in the same place. Some are enemies, but others are friends with clues and hints. Visit them all.

These are the two rogues who stole Jark's Gremlin Stick! Unfortunately, they have hidden it in the Big Monster Tower. Defeat them and then head for the Tower!

Remnants of the Destroyer's armies are wandering the plains and swamps of the Ghoul Realm. If you defeat these stragglers, you will gain a reward of one or two Vials.

This friendly Ghoul will give you directions: Go east and find the Destroyers, if you dare.

Darkoan's followers are confused without their leader. At the end of this maze, you'll enter Darkoan's Palace.

Braeger has sent a couple of Gorillars to make sure Firebrand doesn't make it to Majorita. Use the Claw to beat them quickly!

Once you've summoned Majorita and learned her secrets, you know too much. A duo of Skull Tanks will try to make sure you don't leave the cave alive!

WANDERING MONSTERS

GLOOM EYE

The touch of a Gloom Eye is deadly, but they have a limited range. Avoid them as they bounce toward you. They appear alone or with Man-Eating Plants.

GOUL

Some inhabitants of the Ghoul Realm have gone over to the side of the Destroyers. Convince them to change their ways with a blast of Gargoyle Flame!

GOUL KNIGHT

Especially traitorous Ghouls have been knighted by the Destroyers. They carry Indestructible shields and can only be hit from behind.

GORILLAR

The brutish Gorillar attack in a weird way—by tossing their heads! They can take a lot of hits, so be patient and use hit and run tactics.

TWIN MARR

Twin Marr dwell in the sands of the Ghoul Realm and pop out to attack desert travelers. Leap over their projectiles and return fire.

MAN-EATING PLANTS

Don't let the name fool you—these plants won't hesitate to add a Gargoyle to their menu. Wilt them with your Gargoyle breath before they attack.

SKULL TANK

These creatures are heavily armored but easy to avoid. Take your time when fighting them and get your hits in when their backs are turned.

MALGOR

The hesitant method of a Malgor's attack shouldn't fool you—they are relentless and deadly. Twelve hits are needed to destroy them.

SAND IMP

These tenacious little beings also inhabit the deserts of the Ghoul Realm, and prefer to stay hidden beneath sand. Hit them when they pop out.

THE GHOUL REALM

The vast Ghoul Realm was harsh and forbidding before the Destroyers. Now it is intolerable, with

evil monsters roaming everywhere. You must restore order to the Realm!

EKUZOSU VILLAGE

The inhabitants of this village will threaten to eat you, and those loyal to the Ghoul Realm have been locked up. Although you can get a password here, there are no Talismans for sale.

BUREIDO VILLAGE

You'll find the price of Talismans is inflated in this remote village—they now cost 16 Vials. Other than a temple, where you can get a password, there is not much of interest here.

JARKTON

The first Ghoul village you'll find is the home of Barone Jark. You can buy Talismans for 8 Vials and get a password from the Ghoul shaman here.

GURION TOWN

The town of Gurion is your stepping-off point for adventure to the north. Stock up on Talismans for 8 Vials each, and get a password before you leave.

RUSHIFELL VILLAGE

Again, Talismans will cost you 32 Vials, and a password can also be obtained. This is the final village you will visit before the last leg of your quest!

BYMON VILLAGE

Barone Bymon's village has expensive Talismans—they cost 32 Vials each! Another Ghoul shaman will grant you a password if you talk to him, which makes it a worthwhile visit. You should also be sure to talk with Barone Bymon...

Until you retrieve the Barone's candle from the Sand Maze, he will not help you.

COMBAT SCENES

The numbers on the map of the Ghoul Realm correspond to the close-up maps that follow. It is in these side-view scenes that Firebrand will encounter the greatest challenges to his quest to save the Ghoul Realm. Each Combat Scene includes awesome obstacles that you must

climb and fly over and around, as well as terrible enemies which you must defeat. Be sure to stock up on Talismans before you take on any of these areas.

MAP 1 DIMENSION PORTAL

You'll have to conquer this first hazardous area to enter the Ghoul Realm.

GUARDIAN: GHOUL SHARK

HIGH ROAD OR LOW ROAD?

You'll have a choice of paths at this juncture. Either way will lead you to the same place, although the lower route is a little easier. You might want to brave both to get the Vials.

CAPTURE FLOATING ITEMS

Try to collect as many items as you can get your claws on. Use your wing power (jump and press A again to hover) to catch the items in mid-air, and then head for a safe perch.

MAP 2 FIRE RIVER

The monstrous architecture of this place serves up the challenge, even without enemies.

OLD FAITHFUL

Geysers of flame will periodically roar up through the gaps in the bridge. As soon as they die down, start crossing. Move fast because the bones the bridge is made of will fall into the river of fire once you touch them.

STICKY SITUATION

Thorns and spikes are the preferred decor in the Ghoul Realm. To cross these, get as close to them as you dare, then jump up and hit the A Button again in mid-air to hover.

MAP 3 BIG TOWER MONSTER

Not only is this tower full of monsters, it actually is a monster!

INNER WORKINGS OF A MONSTER

Don't fear the moving pillars you'll encounter near the middle of the Tower Monster. Use them to your advantage to cross the spikes. Remember, you can cling to almost anything, including the sides of these pillars.

MURDEROUS MUSHROOMS

Shoot these poisonous mushrooms from a distance. After you destroy them, they will shoot deadly spores at you. Be prepared to jump and hover, if necessary. Avoid these projectiles.

GRAB AN EXTRA GARGOYLE

A side trip in the tower could result in a 1-Up. Climb up to the half-way point of the Tower. Jump off the side of the Tower and veer right—do not use any wing power. As soon as you catch the 1-Up, start flapping and make for the left opening.

MAP 4 DUST HOLE

This short path is your passage to the northwestern part of the Ghoul Realm.

Don't worry about suffocating in the sand. Gargoyles can hold their breath for a long time.

Watch out for the Bone Fish that live in the Dust. Zap them with your fiery breath!

TAKE A DUST BATH

Dive into the dust pit and "swim" down and to the right. When you reach the right wall, go up and then out of the dust. You'll then be ready to go to Gurion Village.

Jump out of the sand and continue onwards!

GARGOYLE'S QUEST

MAP 5

VALLEY OF FLAME

The terrain makes this valley dangerous. Your flight skills will be challenged!

LOW CLEARANCE

If you rest on the falling platforms under the spikes, make as small a jump as possible when you continue onwards. All the platforms in this level will fall if you touch them.

YOU NEED THE FALCON WING!

Even with the Wing of the Falcon, you'll barely make this jump. Jump up and out as high as you can and when you start to fall, hover and fly across.

FLAME SPOUTS

You can fly right over these flame geysers if you get a high enough jump. Your next stop is Darkoan's Palace!

MAP 6

DARKOAN'S PALACE

You'll find King Darkoan in the depths of his ruined fortress. Wake him with the Candle Of The Poltergeist.

IRON BALL TRAPS

A trigger on the right wall will release a giant Iron Ball from on high. If you don't avoid the trigger, jump to the left wall to avoid the ball.

THE MALGOR APPROACHETH

On the wind-whipped roof of the castle, the Malgor will shriek to the attack. It can be difficult to move quickly due to the winds, so be careful. Use the Buster for maximum firepower.

USE BUSTER ON THESE BLOCKS!

The Block-Buster will let you break blocks that look like they have bubbles in them.

WATCH YOUR STEP

Darkoan's Palace has been ruined by the Destroyers and rigged with flame traps. Some of the blocks that make up the floors and walls are trap triggers; you can detect these by a slight bulge in the surface.

Look carefully to spot the trap triggers.

Step on a trigger and flames leap from the floor.

MAP 7

DESERT OF DESTITUTION

Barone Bymon needs his Candle Of Darkness and it's hidden at the bottom of this desert pit.

FREE FALLING FIREBRAND

Study the map to plot your fall down the pit. Use wing power sparingly as there are few safe spots.

THE SCORPION'S STING

Always try to stay on a different level from this monster to avoid its fire. When it tries to follow you, hit it.

WING IT!

Use your wing power carefully! Drop from the overhang and start flying as close to the ceiling as possible. Be careful on the falling platforms or you might drop into the flames!

FLAMING FOES

Again your path will be contested by enemies on every platform. If you cling to the lower side of the block, you can wait for an opening, then fly up, hover and attack!

MAP 8

PIT OF DARKNESS

Majorita, keeper of the Red Blaze, lives in this cave!

GHOUL KNIGHT GOONS

Cling to the wall and breathe fire at the Ghoul Knights when their backs are turned.

CLEAR THE WAY

Each platform at the bottom of the pit is guarded by a flaming enemy. Drop down and defeat the first one from the right side. Hover in mid-air and defeat the second, then cling to the wall and vaporize the third. Once you reach Majorita, you'll have to question her repeatedly before you'll get what you want.

MAP 9

RIVER OF FIRE

Cross this broken bridge to reach the south eastern part of the Ghoul Realm.

GARGOYLE'S QUEST

MAP 10

THE ROAD TO RUSHIFELL

The six skulls east of Rushifell's village lead to passages like this one. Only the eastern most one leads to Rushifell.

CLAW THROUGH THE PLANT PIT

Three flying plants inhabit this passage. Advance slowly so you only have to face one at a time. It's best to get right across from them and fire on them as they approach.

YOU GOTTA HAVE HEARTS

When you get close to this heart, a flying plant will attack. Fly up and away until you get a straight shot at the plant. Once the plant is wilted, go back and get the heart.

PUMP UP

If you're wounded, go for the heart here. Jump for the gap and activate your wing power when you're lined up.

MAP 11

RUSHIFELL'S KEEP

Rushifell has challenged you to catch him in this labyrinth. It's your toughest challenge yet!

DRILLER KILLERS

Devious drills come out of the spikes in this vertical corridor. Use the Claw to create safe spots in the spikes. Watch the timing of the drills and continue when you can.

GORRILARS GUARD A HEART

There's a heart in this difficult to reach room. You'll have to beat a pair of Gorrilars to capture it, though.

RUSHIFELL'S KEEP IS FALLING DOWN

When the roof starts collapsing, keep moving. If you don't hesitate, you'll make it unscathed.

You're almost to the end; don't lose it here!

RUSHIFELL AND THE SECRET OF RED BLAZE

Red Blaze is a secret power that can be used to move through the air. Use it to get past the spikes in the vertical corridor. Once you're past the spikes, you can use the Claw to create a safe spot to land on.

COSMO TANK™

Defend The Space Colonies

Five planetary colonies are under attack by alien forces. It's up to you to pilot the Tiger space tank through three types of alien blasting action, destroy the Life Cores and free the colonies.

TM & © 1990 Atlus Ltd. Asuka Technologies Inc.

BOMB AND BLAST YOUR WAY TO VICTORY

Defeat the alien forces on each world and you'll earn items that will add to your strength. Power Capsules increase the strength of the Tiger Tank's laser beam. Bombs give you the explosive power needed to break down barricades and defeat large groups of enemies with a single blast.

Bombs are effective against massive alien forces. You can carry as many as 10 at once.

The Tiger is equipped at the beginning with a single short Laser.

Collect 10 Power Capsules and the Laser will double in strength.

You can add to the power of the Laser with more Capsules. When you continue, though, the power will decrease.

PICK UP SPECIAL ITEMS AND POWER-UP THE TIGER

Since the action is shown at two angles, the items look different at the 2-D and 3-D views. But, they still have the same powers.

SPECIAL ITEMS

| 2-D | LIFE | 2-D | BOMB |
|-----|----------------------------------|-----|----------------------------------|
| 3-D | Replace a single unit of energy. | 3-D | Collect one Bomb with each item. |
| 2-D | SUPER LIFE | 2-D | POWER |

QUEST MODE

Take off for a planet saving mission and defeat Alien Life Cores in underground tunnels.

TRAINING MODE

You can practice your alien annihilating techniques in a closed arena before you begin your mission. Once your training is complete, you'll earn a ranking based on your performance.

VS. MODE

Challenge a friend to a Game Link race to see who can beat the alien leader first.

THE QUEST BEGINS ON THE PLANET DESA!

You'll touch down on Desa at the beginning of your journey with an overhead (2-D) view. When you enter the tunnels where the alien forces are hidden, the view will switch to first-person perspective (3-D). Destroy the Life Core and you'll take off in a fast-action shooting sequence for the planet of your choice.

The game begins with an overhead view of the planet's surface.

The view switches to first-person perspective in the tunnels.

When you defeat the Life Core, you'll take off for a short shooting scene.

FORTIFIED ZONE™

The Challenge of a Career for Expert Commandos!

Have you ever wanted to be an expert commando, with the training and ability to penetrate any defenses? Or a secret agent, with the mission of destroying an enemy base? In One Player or Two Player Game Link mode, your mission is to enter the Fortified Zone!

TM & © 1991 JALECO

SECRET AGENT TEAM

In the dark of night, two black gliders float gently to the earth. One is flown by a man, the other by a woman. Both are highly trained spies

beginning a dangerous mission—to infiltrate an enemy stronghold, and take it out!

MR. MASATO KANZAKI

Masato's years in the army have toughened him into an expert commando. He cannot jump, but his great strength and weapons expertise make him capable of facing off against tough enemies. Masato is the agent that can use weapons found along the way.

Only Masato can use the Machine Guns, Flamethrowers, and 3-Way Guns that the team will run across.

MISS MIZUKI MAKIMURA

Also a highly trained soldier, Mizuki stands alongside Masato as an expert in her chosen field. She isn't as strong as Masato and can't use the special weapons, but she is extremely quick and agile, which makes her able to leap over obstacles to safety.

Mizuki jumps safely over dangers like poisonous marshes and spiked floors to retrieve useful items.

FORTIFIED ZONE

STAGE 1

Move warily through the outskirts of the enemy's fortified zone. Pick up everything, especially valuable First-Aid Kits. The quickest route to the Field Guardian is from the upper left corner, where you pick up a Key, through the door on the right and into the middle section of the map.

1 GUN PLATFORM!!

To defeat this giant platform of cannons, fire continuously at it while dodging the barrage of bullets. Destroying the platform rewards the team with a Key!

FIELD

2 AUTO-JEEP!

To send this automated jeep out for repairs, stand between the shots of its 3-Way Gun and fire rapidly at its engine. The engine will soon drop out, leaving another Key.

STAGE 2

The Jungle looks and feels much the same as the Field. The enemies are tougher here though, and they move more quickly. For a fast route through the Jungle, head up and left for a Key, then come back to START and move up and into the upper right area.

1 SPIKE-DRONES

These automated annoyances are no match for our clever spies. Watch these mindless drones' pattern and move from safe spot to safe spot to painlessly pass this area.

JUNGLE

2 FLOOR SPIKES

These potentially painful obstacles are easily crossed by an alert agent. Wait for the spikes to drop back into the floor, then speedily run across before they pop up again.

SUPERTANK

The Jungle is protected by a giant tank that is armed with one very hazardous main cannon and two 3-Way Guns.

Start by shooting determinedly at the main cannon, dodging as the tank tries to get within range.

Once the main gun is gone, stand at the sides of the tank and shoot out the two smaller 3-Way Guns.

FLOOR 1

The Cave offers new hazards as the team closes in on the fortress. For a quick route through this confusing area, head west, then north to Stair A and the 2nd floor. Once on Floor 1 again to Stair B, work west to Stair C. After returning to Floor 1 via Stair D, head north to face a most awesome cave dweller.

CAVE DRAGON

The exit of the Cave is guarded by a huge fiery dragon, and he doesn't like trespassers! The big guy breathes a nifty three-way jet of flame, and his only weak spot is his head. Aim for his brain while nimbly dodging the flame!

Old Firestarter moves towards you, shower his head with bullets.

When he gets close, dodge the flames, then move off to one side and continue countering his fire with a firepower assault of your own!

1 DARKNESS . . .

It's dark in this area, and the agents have forgotten their flashlights. To turn on the lights for better cave visibility, locate the control panel on one wall, walk over to it, and shoot it until the lights come back on.

2 DEAD END??

What's this? There's no other door out of this room, and the far wall is moving towards our team. Try using a little commando marksmanship and shoot rapidly at the approaching wall. It will disappear to reveal the second door.

CAVE DRAGON

FLOOR 2

Wander carefully in dark rooms here on the second floor. Unsuspecting agents can tumble down pits back to the first floor if they're not careful. After arriving on the second floor at Stair A, head southeast, then north to Stair B. Then, after reaching Stair C, work south, then northwest to Stair D.

3 MECH MAYHEM!

This cute little mechanical monster creates problems in getting around. It reverses your motion. For example, if Mizuki heads north, she will actually move south! Destroy it to return things to normal.

4 MOVING FLOORS

Here's a challenge requiring an agile agent. The floor moves underfoot, poisonous marshes grow all over, and the door is locked! To unlock the door, nimbly maneuver over to the control panel on the left wall and shoot it to open the door.

FORTIFIED ZONE

STAGE 4

FORTRESS

FLOOR 1

The Fortress meanders and twists all over the place with tougher enemies every step of the way. The "quick" route is really intricate. Start by going northeast to Stair A, then head south from Stair B to Stair C for a short trip upstairs. From Stair C, keep following the letters to reach the final goal!

1 ROBOT MISSILEER

This well-armed automaton can do some heavy damage to a reckless spy with its barrage of missiles. To defeat it safely, try standing by its side in one of the upper corners, and fire as rapidly as your gun will allow.

2 MORE MECH MAYHEM!

Here's another one of those mechanical monsters that likes to reverse your sense of direction. It sits at the far end of this narrow path, in its own smug droid fashion, and watches your disoriented movements.

FLOOR 2

The quick route for Floor Two begins at Stair A. Head east to Stair B. From Stair C, go south, get the Key, and return to C. From Stair D, work northwest to the ominous black pit marked "E". Leap in! From Stair F, head northwest to fight the War-Dozer, then go back down Stair F for the final challenge.

3 KEY GRAB

These rooms are a short side trip off the main path, but be sure to check them out anyway—this missile-toting mech also carries a Key, which Masato and Mizuki will need to reach the final defender of the enemy fortress.

4 LEAP OF FAITH?

Whoops! This path just dead-ended at an ominous black pit. Where does our team go from here? Well, it's not a dead end—flex your knees and jump into the black depths of the pit to reach the next part of the fortress.

WAR-DOZER

The second level is well guarded by a mechanical behemoth that is solely intent on dozing you.

To pass this mechanized automaton, first shoot away each arm while evading its bullets.

Now stand at its side, shooting the War-Dozer's midsection. Finally, stand in front, blasting it midcenter to finish it off!

SCROOGE GOES POGO!

Bouncing is the name of the game in Duck Tales. Scrooge's super pogo stick enables him to hop high and hop often during his quest. His bounce bops enemies, breaks blocks, and vaults him over perilous pitfalls. The pogo does it all!

TREASURES AND TREATS!

Besides the fabulously valuable artifacts Scrooge is in search of, he can pick up "pocket change" along the way. These items will pad his money bin and his chances of success in his quest.

| | |

| | LARGE DIAMONDS Large diamonds are worth \$10,000. |
| | SMALL DIAMONDS Small diamonds are valued at \$2,000. |
| | HOPE DIAMOND It adds a cool million to your bank roll. |
| | MAGIC COIN Magic Coins grant Scrooge invincibility. |
| | ICE CREAM CONE Ice Cream restores one unit of health. |
| | CAKE Cake replenishes your health. |
| | SCROOGE DOLL These items give you another life. |

A AMAZON

1 HOP TO IT, UNCA SCROOGE!

Use the pogo to cross thorns and make long jumps over wide gaps. For smaller hurdles, use the regular jump.

3 McDUCK IS A DUFFER

Scrooge's pogo doubles as a powerful golf club which he can use to drive blocks. This can be useful to find concealed items and to attack!

2 HIDDEN TREASURE HORDE

Scrooge will find some valuable treasures in secret rooms. To reach these, he'll have to climb over walls and walk along the top of the screen.

If you reach a dead-end, try going over the wall.

4 TREASURE IT

Any treasure is good treasure! Don't skip a single secret room!

5 PIECE OF CAKE

9 BURIED TREASURE

Break down the walls with the pogo and golf swing to reach the 1-Up!

8 WANT A LIFT TO DUCKBURG?

If you accept Launchpad's offer to take you back to Duckburg, you'll return to the Level Select Screen. You can choose the Amazon again or select a different location.

10 PAY UP, DUCK!

The statue demands a \$300,000 payment before it will let Scrooge continue upwards. Unlike the NES version, you can't pogo off an enemy to reach the vine. You must pay!

13 PLAY BALL!

It looks like some giant lost his marble! Wait for it to fall and roll into the passage, then follow it!

14 SUPER SHORTCUT

To get rich quick, hop up and over the wall from the platform. Then go to the Incan King!

THE INCAN KING

Start hopping as soon as you meet the Incan King. It's easier to avoid him, plus your goal is to pogo on his head.

11 SHODDY WORKMANSHIP

This bridge also collapses under Scrooge.

12 HINT FROM NEPHEW HUEY

Huey's hint is pretty lame, even for a duck!

TRANSYLVANIA

WARP MIRRORS

The Warp Mirrors link various points in Magica DeSpell's mansion. These mirrors can be convenient or confusing, so follow the map and chart carefully.

2 THE CEILING IS FALLING

More bargain buildings! You'd think a penny pincher like Scrooge built this mansion!

4 MAKE HEADWAY

Watch for low clearance when you're riding the Coal Cars!

5 AVOID APPARITIONS

Take it slow to avoid the Ghosts when they swoop down on you.

3 AN ESSENTIAL SECRET ROOM

Don't pass up this secret room, even though it is off the path to Magica. It contains an item that will give you an extra unit for your health meter.

This section of the wall looks solid ...

... but you can walk right through it!

6 FREE FALLIN' FREEBIES

As you fall through this area, press Right or Left on the Control Pad to reach the side ledges.

MAGICA DeSPELL

Magica flies about her lair just in pogo range. Watch for her spells when she's in duck form and pogo her four times to win!

HELMET HORDES

Whack each suit of armor to find out if treasure is concealed inside its helmet.

DISNEY'S DUCK TALES

UNDER GROUND

1 BRING ON THE BEAGLE BOYS

The door to the African Mines is locked and the key is in Transylvania. After you talk to Louie, go back to Transylvania, even if you've finished it.

You won't have to explore the whole thing.

Go into the first Warp Mirror to find the key quickly!

2 THE DUCK LAGOON

To make it across this underground lake, you'll have to pogo on the heads of the Creatures From The Duck Lagoon. Timing is critical!

Stand on the edge to draw the Duck Creatures out, then jump!

3 IT'S THE PITS

The trick in this corridor is to get the ball into the pit so you can jump over it.

4 HEALTH FOOD

Mrs. Beaksly is here to help. Grab her Ice Cream Cones to gain stamina!

5 IT'S A CAKE WALK

The wall behind Mrs. Beaksly is an illusion. Go through to get a 1-Up and some Cake!

KING TERRA-FERMIE

Jump to avoid the Terra-Fermie when he rolls into a ball. Pogo on his head when he's in 'Fermie form!

THAT'S NOT ALL, FOLKS! THERE'RE LEVELS OF FUN TO COME!

From the forbidding cold of the Himalayas to the challenges of the Moon, Scrooge won't rest until he has all five of the world's greatest treasures. No one can say this duck didn't earn his fortune!

Fight snowballs with pogo jumps when you reach the Abominable Snowman.

The pogo won't work on the snow!

In the UFO, use the Remote Control to call Gizmo Duck. He'll knock down the wall with his robotic strength.

Paradise In The Sky

It has been said that the tower in the center of the World is connected to Paradise. Many have challenged the secrets of the tower, but none have come back to tell their tales. In the tradition of Final Fantasy for the NES, you play the role of a warrior who recruits three other brave fighters and sets out for a great adventure. The emphasis is on gathering clues and building experience which makes this adventure the first of its kind for Game Boy. Challenge the four Worlds of the tower and discover the secrets behind its four magic Spheres.

Form A Party Of Fighters

Your first order of business will be to recruit a party of adventurers. Every character has his or her own strengths and weaknesses as shown in the table below. The first column is comprised of Humans and Mutants that you can choose as your initial character or as a member of the party.

However, if one of these is recruited from the Guild, their HP will be 20 less than shown here. The second column shows Monsters that can only be your initial character and the third is comprised of Monsters that can only be members of the party.

SPECIAL TIPS FOR YOUR TRIP

1 Base Town

Go to the Adventurer's Guild first and recruit a party of warriors. Then talk to the townspeople and gather clues about the tower. You'll learn from a visitor at the Inn that an evil creature known as Gen-Bu locked the tower entrance years ago and hid the Sphere which opens the door. If you find the Sphere, you'll be able to enter the tower.

2 Town Of Hero

When the statue of Hero donned its armor, sword and shield, explorers were able to enter the tower freely. Now that these items are in the hands of the three Kings of the Base World, there is no access to the Sphere which serves as the key to the tower. If you retrieve the statue's treasures, you will earn the Sphere.

5 South Village

A girl in the village was to be married to the King of the Castle of Armor. Bandit, in the cave to the west, though, has threatened to destroy the village unless the girl marries him. Defeat Bandit and the King will reward you with the armor that belongs to the Statue of Hero.

10 Town Of Hero

Once you have the armor shield and sword, return them to the Statue of Hero and you'll be rewarded with the Sphere. Be prepared for a battle, though, as Gen-Bu will appear and attempt to stop you from entering the tower. He's very tough and very determined that you will not make it to the tower entrance with the Sphere.

TRANSFORMATION TABLE

MONSTER
ENEMY

Eat The Meat Of Enemies For Surprising Results

After some battles, you have the option of letting one of your party members eat the meat of a creature that you defeated. The meat has no effect on humans or mutants but it will turn monsters in your party into different kinds of monsters. Monster Mutation is particularly useful if your monster can turn into a stronger creature or if it is poisoned or hurt in some way. A transformation will make it so that your monster becomes a completely new creature with full energy and a new set of offensive maneuvers. Study the Transformation Table below and you'll understand exactly what type of mutation your monsters will undergo based on the kind of meat that they eat. They are broken up into the several different types of monsters that have the same characteristics.

THE SWORD OF HOPE

A Kingdom Is Cloaked In Darkness

Mysteries, battles, and monsters, take quest through forests, castles, and remarkable castles are just the beginning of the adventure in The Sword of Hope. Listen closely to the tale.

TM & © 1990 Kemco-Seika

IN THE BEGINNING...

There was once a peaceful kingdom called Riccar where a wise king ruled his people. Then a dragon came, and through his evil the people were turned into trees and the King became a tyrant. Now, only the prince of the land can undo the wrongs, and only if he can find the Sword of Hope. Thus begins this Shadowgate-type adventure from Kemco-Seika. RPG action and many mysteries lie ahead for those who dare to seek justice.

THE FOREST

The time has come for Theo to hear the true story of his heritage, and to leave his rustic home in the forest. In the woods he finds a shop, a Shaman and three locked gates. Poisonous moths attack him and the trees speak of dark secrets.

START ▾

• THE WIZARDS

Fearing for Riccar, the three magicians hid themselves as well as the Sword of Hope. Theo must find them and prove himself to them to receive aid.

King Hennesy has concealed his castle underground, but that is Theo's ultimate goal.

HIDDEN ROOM

Not All Is What It Seems

You must Look and Hit in many places to find all the secrets of Riccar. In the shop, a secret room holds a powerful spell.

MARTEL'S DOMAIN

MAN'S
GRAVE
See Pg. 114

MARTEL'S DOMAIN

In the domain of stern-faced Martel, Theo discovers a church, a graveyard, and a deep well. Into each he must delve, fighting foes and collecting items. Some of these places he must visit twice.

CAMU'S DOMAIN

Camu's Domain stretches from the forest to the Tower and is filled with treasures and danger. You will meet a mysterious lady, but who is she?

START

See pg.113

Lady Of The Lake

She appears like a phantom near the lakes and fountains of Camu's Domain, but who is she? Theo must answer her questions correctly or face the wrath of the Lamia. Theo must defeat Lamia to answer more questions.

At the fountain, $\text{HP} + 100$
 $\text{MP} + 100$

$\text{HP} + 100$
<math

At this door, you will have a choice either to Push or Pull. Pull the door to reach O. Push to reach N.

TO THE CASTLE

Passing through the underground dungeons you will finally reach a gate (P), which leads to the Castle itself. Can it really be this simple?

ANOTHER ROUTE

If you took the ivy vine on the right side of the room back in Camu's cave, you'd end up here in the Halls of Fog. If this is where you are, start over and take the left vine.

THE ABYSS

The Abyss is a dark, wet hole on Theo's way to the castle. Bring extra Barley and Herbs to keep up your strength.

THE CASTLE

This underground castle is really a devious maze with rooms that mirror each other. Theo must keep every detail in mind if he is to remember where he has been.

THREE DWARFS

What are these three dwarfs doing in the castle? Two of them are trying to fool you, but one will be of help, so keep an open mind.

The Right Stuff

Sometimes right is the correct choice, as in the case of the three dwarfs.

The Throne Room

You can Hit the King's Throne to receive a secret spell.

The Princess Knows

See the Princess to learn the secret of the mirror rooms.

TO THE KING

The King, Prince Theo's father, who was corrupted so long ago, waits just ahead beyond the beds of roses.

THE FINAL BATTLE?

Two have travelled far and learned much. He has won and gained strength, magic and weapons. He has been taught powerful magic spells. All of this has been in preparation for the battle with the King. The King is indeed strong. If you have the Sword of Hope from the Old Man and full magic, you'll stand a good chance of victory.

He may be Theo's dad, but may also...

King, for the King is indeed strong. If you have the Sword of Hope from the Old Man and full magic, you'll stand a good chance of victory.

TO THE KING

Once the King falls in the might of Prince Theo's arm the truth is revealed, for King Hennessy has been just a puppet for the true evil in the kingdom. If Theo hopes to free the people who have been turned into trees, then he must battle the dragon who is stronger than any enemy of earth, sea or sky. The Sword of Hope is the only hope for this troubled land.

ULTIMA

A Search For Virtue In A Dark Age

Enter the realm of Lord British. FCI's latest addition to the Ultima series. Combining mystery and action in a battery-backed adventure, it's the ultimate quest for the role-playing enthusiast.

© 1991 FCI © 1991 PONY CANYON © 1991 ORIGIN

RECOVER THE EIGHT RUNES

It is a bleak time in Britannia. The Black Knight has stolen the Eight Runes of Virtue from the Castle of Lord British, and now an ominous pall hangs over the country. The Runes lie hidden deep within the dank caverns that scar the hillsides, waiting for one brave enough to seek them out. Perhaps you are that valiant voyager.

FEARFUL FOES

TROLLS

Like little soldiers, they march back and forth. Avoid the axes they sometimes throw.

GHOSTS

These eerie apparitions float right through the walls. It takes three hits to stop them.

GREMLINS

The tiny trouble-makers dart about quickly, stealing food and sapping Life Force.

SLIMES

These globs of goo slowly ooze after you. You can walk through them, but it's slow going.

In the darkness of the caverns dwell creatures of the night, an odd assemblage of evil incarnate.

SKELETONS

They hurl knives from a distance. Stay out of the line of fire, then throw axes back.

SNAKES

Snakes slither after you. From a safe distance, strike them with axes three times.

RATS

Rats! These pesky little vermin dart around randomly. Try using cheese or the axe.

WIZARDS

When you face a Wizard, expect a fierce fight. They throw deadly stars in all directions.

BELIEVE IT OR NOT

In a role-playing action epic such as this, you'll spend much of your time searching for information. Plenty of characters are willing to give you tips, but you can't trust all of them. Some of them lie outright!

Dr. Cat
The X's in this Cavern will teleport you back here!

Fine
Pull this lever, never use the same path again.

Others will deliberately try to mislead you with faulty directions or information.

REAPERS

Jeepers creepers, these Reapers are mean creatures! Dart in and fire when their darts pass.

WISPS

Now they're here, now they're not. You never know when they'll appear. Watch out!

JAGGERS

They're animated, but they're no rolling stones. You can't beat them, so roll around.

CYCLOPS

Don't think about sneaking safely past—these one-eyed wonders have 20/20 vision!

ULTIMA: RUNES OF VIRTUE

CAVERN OF DECEIT

ROUTE TO THE MAGIC WAND

One of your first destinations, the Cavern of Deceit is due north of the Castle. Begin your search for virtue there. Fiends await just inside the entrance; somewhere beyond them lie treasures and the Rune of Honesty.

The Route To The Magic Wand

You'll need the Magic Wand to sweep away the spider webs that block your ship's passage to the west. These steps will lead you to its resting place.

Begin your search by dropping into this hole.

Find a Hammer in the Mushroom and break a Barrel.

Search for a secret passage near the Trolls.

Step on the floor plate to find the Magic Wand.

The Route To The Rune Of Honesty

The most accessible of the eight Runes, Honesty is deep within the Cavern of Deceit. Begin in the Swamp Chamber and follow this path to find it.

Flip the switch when the Troll's at the top.

If you flip this switch, monsters are freed.

Play it safe by staying on the foot plates.

Flip the switch and discover the Rune.

CAVERN OF HATRED

Just north of the Castle is your next stop, the Cavern of Hatred. If you can withstand the attacks of bats, tigers, and killer trees, you'll discover two valuable items: the Magic Axe and the Rune of Compassion.

The Route To The Rune Of Compassion

The path to the Rune of Compassion is perilous, and the two Reapers who guard it never sleep. Cross the Arena, dodging the statues' deadly spears.

Go down the ladder to Dr. Cat's cave.

Flip the right switch back and forth. Rocks!

Fill the spaces, then flip the other switch.

When the rocks become pools, warp to the Key.

Eat the first 'shroom and step on a plate.

Dodge arrows, then attack.

When you've beaten them, retrieve the Rune.

Rune of Compassion

The opening to the cold, musty Cavern of Cowardice is on the eastern island. Explore it carefully to find the Magic Rope and the Rune of Valor. Ignore the signs you come across — they're misleading!

These arrows are strictly one-way. Instead of following them, push through the false wall above.

Enter the warp disc on the right to come out in the small area near the upper warp disc.

The Route To The Magic Rope

Thread your way from point A through point G, where you'll find the Magic Rope, a useful item that will help you cross rivers, channels and streams.

Route To The Rune Of Valor

The path to this Rune, which proves that you are indeed courageous, is long and trying. To ensure a successful journey, take extra provisions with you.

The enemy in the center can be deadly! You must run down through the passage without being hit by his attack.

If you can survive the fire of the enemy guards, you can pick up the Rune of Valor in this room.

ULTIMA: RUNES OF VIRTUE

CAVERN OF SELFISHNESS

Use your Magic Rope to cross the northeastern island where the Cavern of Selfishness lies. Jaggers and Eep Eeps block your path to the Magic Chalice and the Rune of Sacrifice. You will need both to continue your journey.

The Route To The Rune Of Sacrifice

This Rune proves that you have shown selfless dedication and uphold the ideals of law and order.

Burn the spider webs then cross to the ladder.

Switch the Lever, right, and continue down.

Only Lightning damages the Black Knight.

Use the Trumpet to freeze the Eep Eeps.

Enter here from F and prepare for battle.

Defeat the guard and pick up the Heart Key.

Use the Heart Key to open this door.

Open the upper right box and take the Star Key.

Open the door with the Star Key. Flip the lever.

This is where you obtain the Lightning.

Now use the Lightning to beat the Black Knight.

Pick the mushroom, take the Star, continue up.

Collect the three Hammers and break Barrels.

Follow the Eep Eep to the first ladder.

Take the Key, then go down the ladder.

You need a weapon to break the Barrels.

Take the Key from the Chest above you.

Take the hidden Hammer to break Barrels.

The Route To The Magic Chalice

The Magic Chalice is a valuable item. When you're running low, use it to recover lost Hearts. Every use costs Magic Stars, though.

South of the Cavern of Selfishness lies the Cavern of Injustice. It houses the Pan Pipes and the Rune of Justice. As the sign warns, you must locate the Keys and hurry through the first chambers. Beware of Ghosts and Slime!

The Route To The Pan Pipes

The Pan Pipes can be lifesavers. Use them to temporarily freeze your enemies when you're in a bind.

Find the Keys and go to C within 15 seconds.

Rush to the exit in the upper right area.

Avoid the slimes and go down the ladder.

Avoid arrows and run to the door, right.

Dodge dark areas and exit at the bottom.

Pick up the Pipes from the lower right.

The Route To The Rune Of Justice

Swamps, Slime, Lava Flows and Fireballs stand between you and the Rune of Justice. Are you prepared to seek it out?

This is fool's gold! Don't take any coins.

Scramble from the Slimes and move upward.

Don't stop to talk! Enter the room on the left.

There's a Ladder! Go down to the next level.

Keep moving on. Exit on the right.

This Ladder leads to S. Go on down.

Be sure to get the Hammer before you leave.

Take the Key from behind the Barrel.

Break the Barrel with a Hammer. Exit right.

Destroy the attacking Chest and get a Hammer.

Break the Barrels and go stand on the X.

Hearts appear in the nooks! Pick them up.

Walk through the brick and talk to the Eep Eep.

When you talk to him, a path suddenly appears. Follow it to the Rune of Justice and pick it up.

ULTIMA: RUNES OF VIRTUE

CAVERN OF DISHONOR

In the south you'll discover the Cavern of Dishonor. Deep within are the Magic Whip and the Rune of Honor, both of which are vital to your success. They aren't easy to obtain, but then, things of value seldom are.

The Route To The Magic Whip

Many levels beneath the surface lies the Magic Whip. Its sting is mighty and its uses many. Be sure to locate it and pick it up. Search carefully!

Enter this room from B. Continue to the left.

Use the Magic Rope to cross the stream.

Use the Rope again to cross the Swampy area.

Arrive via a warp disc and exit below.

Pick up the Mushroom then exit.

Muddle through the Swamp and use the lower exit.

Take the Star Key and exit on the right.

Use the Magic Rope to wade through the area.

Here you'll find the Magic Whip.

The Route To The Rune Of Honor

A>B>L>K>J>I>F>C>D>E>G>H

Proof of honorable acts and valiant deeds, the Rune of Honor is hidden and well guarded by formidable foes. Be brave!

From room J, flip the lever and move left.

Take the Key and go up through the door.

Continue moving up to the tunnel entrance.

Use your strongest weapons on these thugs.

Don't attack! You'll just make him mad.

Avoid monsters and continue to the right.

TWO MORE CAVERNS TO GO!

We've introduced the first six but you're on your own in the final two Caverns. If you've mastered the strategies that work in Levels 1-6, you're in good shape to begin the 7th. Be prepared to face longer, more complicated sequences and tougher, more fearsome foes. The fate of Britannia lies in your hands. Return it to a brighter age!

You must return to the south island to explore the Cavern of Pride. Use the Magic Rope to get the boat.

The entrance to the Cavern of Pride is blocked by the Black Knight. To move him, use Lightning.

GOLF WHEN AND WHERE YOU WANT

Nintendo Golf is packed with special features, including a battery that automatically saves your game so you can return later. You'll also have the choice of playing a Japanese or American course. In addition, you can enter your name and that of a friend if you're playing a match.

You can choose to save a game, then later you can continue, start the course over, change courses, or even enter a new name.

Both the American and Japanese courses are filled with challenges. What makes Golf such a great game is that you always have room for improvement.

THE VIEW FROM ABOVE

Shot Screen

From the Shot Screen you can aim your shot, choose a club, check distance to the pin, weather conditions, shots taken on the hole thus far and overall number of shots above or below par for the course.

Hole Screen

You can study the hole, scrolling down the fairway with the controller on long holes to see all the bunkers and water hazards to plan your strategy.

Green Screen

Scrutinizing the lie of the ball once you reach the green is vital. Dark arrows indicate steep slopes where the ball will be ruled by gravity. Lighter arrows are shallow slopes.

JAPAN COURSE

The Japan Course offers a wide range of golfing situations to master. Some of the shortcuts look promising from the tee, but you should take care when trying to cut strokes. It's usually slow and

difficult and can ruin a round. The first time out, just get a feel for the course and practice Super Tee Shots. Next, try to score Par. By this time you'll see where you can shave some strokes.

OUT

1 391yds
Par 4

The 1st hole is pretty straightforward. Aim down the fairway, adjusting slightly for the wind with a strength of more than 3. Go for the Super Shot by hitting a 1 Wood in the black zones of the Swing Meter. Your approach shot should be close to the pin to avoid long putts on the steep, central slope.

OUT

2 468yds
Par 4

This long Par 4 gives you a choice from the beginning. The left side is your best bet, even if you hit a Super Shot and end up in the rough. Your second shot should be straight toward the pin. The green has a ridge and two steep slopes. Putting across this slope will test your patience.

OUT

3 162yds
Par 3

This short Par 3 is a great place to get a Birdie. It's also easy to end up losing strokes by landing in the water. Hit long rather than short. Unless the wind is strong and straight ahead, use the 5 Iron with a soft touch. The green is slightly sloped, and not too tough. Go for greatness!

OUT

4 479yds
Par 5

This monster hole is a real challenge with the possibility to mess up miserably. The safe course is to hit a 1 Iron to the left of the left fairway, then hit the 3 Wood and pitch onto the green. Thrill seekers will knock the ball over the water with a Super Shot to the patch of fairway. Good luck.

OUT

5 380yds
Par 4

If you're tempted to go for the patch of fairway beyond the trees to the left, don't do it unless you just want to practice. A Super Shot, and well placed approach shot should get you into Birdie range. The green is a three-sided bowl, which is terrific if the cup is at the bottom.

OUT

6 226yds
Par 3

The 3 Wood is your best bet for teeing off on this short hole. Drop it short if you can, because the green runs away from you and can easily send a ball into the water at the top of the screen. The green can be deceptive when putting uphill. Put a little extra muscle into it.

OUT

7 274yds
Par 4

Only attempt to hit directly to the green over the water if you have a strong tailwind and confidence in your Super Shot. If you succeed, it's Eagle time. Otherwise, hit 200 yards up the fairway, then use a medium iron to reach the green. The green is a mound and very tricky. Reading it takes practice.

OUT

8 335yds
Par 4

Cutting the corner on this dogleg left is your ticket to a Birdie, just make sure you stay in-bounds. When hitting over water hazards, it's often a good idea to use more club than you would normally. The green here on 8 is a hill with one steep side and one shallow side.

OUT

9 495yds
Par 5

Another monster, number 9 seems to offer a shortcut to the patch of fairway straight in front of the tee. Don't take it unless you can hit a miraculous second shot that clears more than 200 yards of out-of-bounds. The conservative route can also yield a Birdie if you really whack the ball.

OUT

10 342yds
Par 4

Try for a Super Shot to the corner of the dogleg left, or hit just short of the left water hazard and send the second shot over the trees. The green slopes down from a plateau, so hitting to the flat is best. From there you can dribble a putt down to the cup, depending on placement.

OUT

11 142yds
Par 3

Take just a little off the 6 Iron to put your tee shot on the green. The green itself is a mix of shallow slopes and flat areas, which makes for fairly easy putting. This is a good hole for Birdies, and there is little danger in ending up with an over-par score.

OUT

12 393yds
Par 4

The strategic player will do well on this hole. Hit a short drive to the top of the first fairway. It's about 175 yards. From there, a good Wood will take you to the second fairway or the green. Watch out for the trees on the narrow fairway. The green is highest on the water side which helps to stop pitches.

OUT

545yds
Par 5

A double dogleg, left then right, number 13 is a tremendous challenge. The trees along the left side of the hole as you tee off prevent the easy Super Shot across the corner of the first dogleg. In the long way around and try for an excellent fairway shot. The green has two ridges.

OUT

443yds
Par 4

A Super Shot in the second fairway will set you up in excellent position, but it takes a long shot about 260 yards. Don't try it if the wind is against you. The green has two slopes, neither terribly steep. Par is easy on this hole, but Birdies are hard to come by.

OUT

258yds
Par 4

This short Par 4 tempts you to go for a Birdie, or even an Eagle. But it isn't easy, especially if the wind is against you. A tree sits smack in the line to the hole, too. Play it smart and take the dogleg. A good second shot can still put you in position for a Birdie.

OUT

429yds
Par 4

This is one of the trickiest holes. The distance to the right side of the river is intimidating, but a Super Shot can carry you the 250 yards. If the wind is with you, go for it. The green is a hodgepodge of slopes that can drive you nuts. Get close on your approach shot.

OUT

484yds
Par 5

This diabolical hole will take no prisoners. An aggressive player with a strong wind at his back will aim for the second fairway about 260 yards away. Smart money goes to the survivor who drives down the first fairway. Your second and third shots are the most critical.

OUT

207yds
Par 3

Selecting the right club for your tee shot is the most important decision on this hole. The 4 Wood is your best choice. The green has a lot of slopes and can give you trouble. Still, the 18th is a good hole for Birdie attempts.

USA COURSES

This course is a little bit tougher than the Japanese course, with water everywhere, trees planted smack in the way of shortcuts and difficult greens. Don't expect to master it overnight.

or even in a lifetime. There's always some new angle to try or new conditions that alter your play.

OUT

384yds
Par 4

The first hole is particularly deceptive. It looks easy, but it's a killer. A Super Shot drive will probably take you close to the trees below the green. Pitch over them, then go for a shorter drive with the 3 Wood, and use the 3 Iron to drop your second shot right on the green.

OUT

194yds
Par 3

This hole is pretty easy provided that you don't hit long. If you drive into the bunker you can kiss your Birdie chances goodbye. The 3 Iron will put you on the green if you have the wind at your back. Otherwise, use the 1 Iron. The green has two difficult slopes, but most of it is gentle.

OUT

481yds
Par 5

If you drive straight toward the green, make sure that you hit a solid shot or you'll end up in the drink. Your second shot should take you over the lake to the tip of the dogleg fairway. Reaching the green on the second shot requires a miraculous fairway drive across the lake. Good luck!

OUT

352yds
Par 4

The fairway isn't always the best way. Here on the 4th hole you can hit over the trees to the right of the tee. Use a 3 Wood, which leaves you 180 to 190 yards from the pin. Your second shot will put you in Birdie range. Once on the green, a steep central slope requires strong putts.

OUT

408yds
Par 4

A solid drive to the top of the first fairway will leave you about a 1 Iron away from the green. This is the best strategy. A good approach shot will set you up for a Birdie, but the green is a monster with slopes heading in every direction. Concentrate on making par on this hole.

OUT

556yds
Par 5

The left fairway is shorter than the right, but it's narrow and crooked and doesn't offer an advantage. Go for a Super Shot up the right fairway and follow it with a 3 Wood toward the green. The most critical shot is the third. Get as close to the pin as possible, because the green is a roller coaster.

GOLF

OUT

7

354yds
Par 4

The left fairway looks as if it will get you closer, but the tree at the end blocks most direct shots to the pin. Drive to the right fairway instead, then hit a long second shot to put you in the money. The green is steep and difficult to read. Birdies won't come easy.

OUT

8

398yds
Par 4

A short drive to the left with the 5 Iron will leave you about 220 yards from the green. An extraordinary second shot across the waves using the 3 Wood should put you on the green, but the danger of sinking one into the water is great. Once on the green, putt lightly.

OUT

9

186yds
Par 3

The first time you see this hole you'll probably think it's a joke. Precision is the key. The 4 Iron should do the job, but pay close attention to the wind and adjust your club choice or swing if wind strength is above 6. You should be able to sink a Birdie on this one.

OUT

10

331yds
Par 4

A Super Shot in the left is best on the 10th because chances are you'll end up on the fairway, which means your second shot will be longer. Hit your second shot precisely to avoid the bunkers. The green is a complex patchwork of steep and gentle slopes.

OUT

11

498yds
Par 4

Again you'll have to risk getting wet if you want to come in under par for the hole. A Super Shot followed by a 3 or 4 Wood will get you onto the green. As long as you don't hit the two ridges in the green, you'll putt safely. Playing to the right results in Par at best.

OUT

12

454yds
Par 4

The left side offers the best chance of reaching the green in two. A Super Shot onto the fairway will put you within the range of a 1 or 3 Iron. The green on 12 is a bizarre collection of hills and valleys. Expect at least a two-putt.

OUT

13

147yds
Par 3

The green is surrounded by bunkers, so your drive must be right on the money if you want to beat par. Don't expect to blast one for any distance out of the sand. Just stay out of it. The green is another cruel, twisted thing that will scare the willies out of most hackers.

OUT

14

451yds
Par 4

Only a mighty Super Shot will carry across the water to the upper fairway. If the wind isn't against you, go for it! The real horrors begin when you hit the green. The middle section is steep and the skirts are difficult to read. Happy to shoot par on this hole.

OUT

15

394yds
Par 4

Hit to the fairway on the right for a clear shot at the green. On the left, you'll have to hit a monster shot to set yourself up. The green is split in two with rough running between the halves. Always check the green before hitting to it. Judge where the cup is located.

OUT

16

232yds
Par 3

This hole is made difficult by the placement of the tree in front of the tee. You'll have to hook your shot to the right around the tree to hit the green. It isn't easy. Use the 1 or 3 Wood, depending on wind strength and direction. The green, as usual, is steep and fast.

OUT

17

500yds
Par 5

Put your drive on the fairway straight ahead using the 3 Wood. The right fairway is then about 150 yards away; just don't place the ball too close to the trees between the fairway and water hazard. Shoot for the middle. The green has a tiny water hazard in the middle and steep hills.

OUT

18

429yds
Par 4

Try to place your drive just below the bottom of the first bunker. From there you should have a long but makeable shot to the green. Any other placement leaves you blocked by trees or too far from the green. Once you're on the green, you'll find several difficult troughs.

Test your performance on the eight Grand Prix courses with competing cars or go solo.

MULTI GAME

Game Link with as many as three other players in one of three challenging five-course tours.

Choose Your Machine

Choose from two cars. Type A is super-charged. Type B is better in curves.

Corner With Caution

If you're weaving all over the track in the corners, you'll waste valuable seconds. Stay on the straight and narrow as much as possible, then turn quickly and decisively.

MASTER THE COURSES

The last set of curves in this course are the easiest to negotiate. Try to pass, then get ready for the home stretch.

The straight sections of this course are real turbo-boost opportunities. Put the pedal to the metal and pass as many cars as you can.

Two quick corners approach one after the other. Take it easy through the curves. Then hit turbo in the straightaway.

You'll start in tenth position, but with a turbo boost, you can move into seventh before the first curve.

Reduce your speed as you enter the corner. Then try to pass as you pull out.

Stay near the center of the track for the straightest course in the ess curves.

F-1 RACE

The U.S.A. track, which we've shown in detail, is the third track you'll encounter on the circuit. The rest of the tracks shown below are just as challenging... if not more so.

AUSTRALIA

The most straight-forward course on the circuit is the best for total turbo action. Slow it down in the curves on the back stretch, then blast off!

CANADA

The map of this course is deceiving. It's a standard oval until you get to the back, then it digs in for a wild ride. Watch for treacherous 90 and 180 degree turns.

PORTUGAL

Don't worry about passing in the curves of the Portuguese course. Just keep your position, then gun it on the straightaways and go for first place.

JAPAN

The Japanese course is one of the toughest. There's no need to get fancy. Just maintain a consistent speed and try to avoid wiping out. You'll be number one in the long run.

BRAZIL

There are curves-a-plenty in this course. Pass as many cars as you can at the beginning of the course. Then, on the second half, just concentrate on survival.

U.S.S.R.

The Soviet course appears to be more difficult than it actually is. While there are plenty of curves to endure, you should do well in the straightaways.

INDIA

There are a lot of similarities to the Brazilian course in this challenger. In this course, though, you'll find longer straightaways and fewer curves.

EGYPT

With the exception of some super difficult turns, the Egyptian course is one of the easiest to negotiate in the circuit. Run fast and corner carefully.

CHINA

If you're an experienced racer, you should be able to do plenty of passing in the windy Chinese course. Slow down in the turnarounds and keep racing.

NEPAL

The straightaways are key in this complicated course. Pour on the turbo when there are no curves in sight, then try to keep your position during the rest of it.

HONG KONG

This is a quick one for expert racers. You should be able to pass in the straightaways and most of the curves. Then take it easy in the turnarounds.

HAWAII

This Island course tests your abilities to turn and use turbo at the same time. Try to stay inside on the curves and pay attention to the signs.

HOLLAND

This course is very straight forward in that there are obvious all-out turbo areas and equally obvious slow, curving areas. Take each section as it comes.

Climb Behind the Wheel of a Nascar Car

TM & © 1990 Paramount Pictures © 1991 Mindscape Inc.

Daytona is the most famous track on the Nascar circuit, and it draws the biggest names in the racing world. You're up against pros, and you have to drive aggressively to get an edge. You can rub the walls at Daytona, but each time you bump them, you'll damage your car.

If your qualifying time is slow, you have to handle heavy traffic.

TAKE IT EASY!

Hit the brakes here to prepare for the coming corner.

RACE OUT & OUT

On a banked track, hold a high line on the straightaways, drop in tight on the turns, and head straight for the outside of the next stretch.

From the outside of this stretch, make a line...
...through the corner to the outside.

PRACTICE PITSTOPs

The entry to pit row is narrow. Don't crash into the concrete divider! The computer takes over once you enter, letting you concentrate on managing your pit crew.

SCREAMIN' ON THE STRETCH

Daytona has the longest straightaway of the circuit. If you floor it, you can hit 207 mph. This is your opportunity to either lengthen your lead or make up for lost time.

DAMAGE CONTROL

Racing on the banked oval eats tires fast, and rubbing the wall or bumping other cars can cause flats. You can eliminate some competitors by forcing them into the wall, but keep in mind that contact damages your car, too. Press Select to check your car's damage level and the condition of your tires.

SLIPSTREAMING

Snug in behind other cars on straightaways. Their slipstreams, or drafts, pull you along, allowing you conserve precious fuel.

TOUR WITH THE PROS

PHOENIX

A short, classic oval course, Phoenix has lots of curves. Brief straightaways make it hard to hit top speed, so you have to make the corners count.

ATLANTA

Curves at Atlanta are only slightly banked, so it is hard to drop inside and slip by the others. Accelerate quickly to eat track in the straightaways.

MICHIGAN

Michigan's track is fast and relatively flat. When the track curves slightly, save ground by staying in the center and driving straight through.

MIAMI

The slightly banked curves at Miami give you a chance to slingshot by opponents. Although it has lots of curves, you can turn in good lap times.

TAKE THE CORNERS LIKE A PRO

The degree of a track's banking determines how you handle the curves. Flat tracks leave little room for surprise moves, but on steep corners you can shoot for the low line.

FOUR-PLAYER FUN!

The action really heats up when friends control some of the cars. Use the Game Link cable for a two-player game, the Four Player Adapter for more. When you think about causing them to crash, remember that they can turn the tables and bump you!

Enter your friends in the race. It's more fun to play than watch!

You can temporarily trap them by flipping a whole line at a time, but they can get back at you! Easy early stages allow you to get the hang of the game, but they rapidly become more difficult as new hatchlings and obstacles are added. If you're ambidextrous, this is the game for you!

ROUND 1 **ROUND 2**

DR. MARIO

2 Player (GL)

What's Up, Doc?

Feisty viruses, that's what, and if they escape, they'll spread like the plague. Dr. Mario tosses out vitamins, and when you place three over a virus of the same shade, you'll wipe it out. When all are gone, you clear the screen and progress to the next level. Like the popular NES version, it has a two-player mode that is especially fun. Players set their own levels, so two with different experience levels can still have a competitive contest.

FUPULL

2 Player (GL)

Keep Cool, Cube Crasher

It's you against the Cubes in this strategy game from Taito. Each is marked with one of four symbols, and they're stacked in various shapes. You, the strategist, eliminate blocks by throwing your block at others with the same symbol. When you clear the screen, move on to more challenging stages. Rack up the points by clearing more than one block at once and by working quickly. You have to think several moves ahead in this fast-paced puzzler.

THE GAME OF HARMONY

1 Player

Enter A New Age Of Serene Software

A game that demands relaxation? Believe it.

You control the Seeker, a sphere containing a directional arrow. Your goal is to "synergize" the other pulsating orbs on the screen by pushing those containing matching shapes together. These Energy Spheres eventually explode if not united with a like orb, but when they are, they dissipate harmoniously into the atmosphere. Good luck.

HATRIS

2 Player (GL)

The Mad Hatter Is Working Overtime

From crowns to cowboy hats and bowlers to beanies, the mad hatter is dropping them all. You must stack them, caps on caps, top hats on top hats. When you pile up five of a kind, they disappear, and with every match, you accumulate points. See how your skills stack up against an opponent in the two-player mode. It moves quickly and gives you a chance to make your foe blow his stack.

KLAX

1 Player

When The Waves Hit, Go With The Flow

The patterned Tiles come in waves, and your job is to keep a cool head and stack them with others of the same patterns. When you pile them three-high, they form a Klax and vanish, clearing the spot for a new stack. Get your sea legs in Level 1, then get fancy and form designs with the tumbling Tiles in later rounds. Some designs produce secret warps. Crisp sound and solid play control make this game interesting and challenging.

KWIRK

2 Player (GL)

Has This Hip Tomato Flipped Out?

Behind the shades is a tomato determined to pick his way through the maze of rooms ahead. Each room is a puzzle, and many obstacles block your way. Only by flipping, pushing and turning them in the correct order will you clear a path to the door. In Stage 1, you'll figure out how each obstacle moves in rooms that are fairly easy to clear. Stages 2 and 3 are more complex, though. It is a challenging game that has three play modes and dozens of rooms.

LOOPZ

2 Player (GL)

Square It Up To Score Big

Mindscape's connect-the-pieces puzzler will really throw you for a loop. The object of the game is to complete a loop using the various shapes that randomly appear on the screen. Half-loops, corners, lines and zig zags show up one at a time, and you have just a few seconds to decide where you're going to put each. The more complicated the shape you complete, the more points you'll rack up, so the game is just as tough as you want to make it.

PIPE DREAM

2 Player (GL), Password

If The Flooz Leaks, It's A Nightmare

Don't hire a plumber—do it yourself, and find out why plumbers are paid so well! Pick up the pipe wrench and start connecting the pieces that appear on the screen. Hurry! When the Flooz starts oozing, you have to stay one step ahead of the flow. If it leaks out of the end before you can connect a piece of pipe, you're sunk. Build up points fast by crossing existing pipes. In the two-player mode, players actually help, rather than hinder, one another.

Q-BILLION

2 Player (GL)

It's Time To Clean House

Mouser is cleaning out the warehouse, but the mini-rodent can manage to move only one box at a time. When they're stacked, you have to figure out how to reach the top boxes to push them off. To clear them, place four boxes with the same symbols in any side-by-side configuration. In the two-player mode, you have to think fast and solve the puzzles before your opponent does. It's a challenging game that forces you to plan sequential steps in advance.

QIX

2 Player (GL)

Get Your Kicks Rounding Up The Qix

When you begin, the Qix, a bouncing beam, has the screen to itself. Your goal is to block its access to 75% of the screen while avoiding the sparks that travel along the perimeter. Press A and Up on the Control Pad to begin closing off chunks of free space, but don't let the Qix bounce into you before you complete your line. The real challenge is coming close to the 75%, then marking off a huge section of the remaining screen with your last move to build big bonus points.

QUARTH

2 Player (GL)

Break Them Up With The Blockbuster

If the shapes that fall from above crash into the Quarhdome at the bottom, you're Quarthed and the game is over! To protect the dome, pilot your Blockbuster along the bottom of the screen and fire blocks at the shapes. When the blocks combine with the shapes to form complete squares or rectangles, you wipe them out. The two-player mode is especially fun because you can surprise your opponent by speeding the action up and hiding shapes on their screen.

SOLOMON'S CLUB

1 Player, Password

Now You See It, Now You Don't

A magician with a magic wand that makes blocks appear and disappear moves through various rooms as he figures out which paths lead to their exits. Each room holds a key that he must pick up in order to open the exit door. He also collects various treasures and coins while avoiding the fire of strategically placed enemies. The rooms range from quite simple to very complex, but the convenient built-in stage select lets you begin at your own skill level.

TETRIS

2 Player (GL)

Line Up For A Popular Puzzler

Tetris has taken Game Boy players by storm. It's simple to learn, yet there are dozens of strategies that can make you a more advanced player. Seven four-block patterns fall into the screen and it is your job to arrange them so that they form horizontal lines. Completed lines disappear and help make the stack of blocks a more manageable height. If you score multiple-line completions in a two-player game, lines are transferred to your opponent's screen.

Tiles with assorted characters are arranged in a pile in this popular Chinese game. The object is to find matching pairs for all of the tiles. Each matching pair is taken away so that you can get to the tiles that were previously covered. When all of the tiles are gone, you win. The Chinese characters on the tiles can be changed to letters and numbers that may be more familiar to a North American player.

GAME BOY

Spot Captures Your Attention

Spot is a challenging board game similar to Othello. Your goal is to control the board by capturing your opponent's pieces. You can claim your opponent's markers by moving one of your pieces next to his. Every time you move, all of your rival's pieces will become yours. Plan ahead, though. If you don't, you could lose up to eight of your pieces in one fell swoop. Spot flips and dances trying to cheer you on to victory.
